The New Steinway
Miniature Grand Piano
(Trade Marked)
is proving a constant and
increasing source of won-
derment and delight to all
musicians and music-lovers.
Scientific experiments and acous-
tical researches have determined the
exact size, namely, five feet ten in-
ches, necessary to reproduce the remark-
able attributes and qualities of our larger
Grand Pianos. Any Grand under this size
crosses the danger line, as it cannot yield a
tonal result superior to that of the discarded
Square or the present Upright Piano. The full,
rich and sweet tone of the Steinway Miniature Grand
and its dainty appearance are already giving the utmost
satisfaction to thousands of purchasers, and we recommend
a thorough examination and trial of this unique instrument

STEINWAY & SONS,
Steinway Hall, 107 and 109 East 14th St.
NEW YORK.
Subway Express Station at the Door.

$259 For a brand new PIANO worth $400.
Guaranteed ten years. All the improve-
ments—cover, stool and book $10.00
down; $5.00 monthly. Same quality as
others sell for $300. WE CHARGE NO INTEREST.

GRUNEWALD'S.
735 CANAL ST.

"When it comes from
the Grunewald's you can rely
upon its goodness."

Pianos
Of the Greatest
Artistic Merit.

Used and recommended by all
the musical celebrities, profes-
sion teachers, schools, colleges
and conservatories of music.

The Leaders are
STEINWAY, KNABE,
SOHMER, MEHLIN,
FISCHER, SHONINGER,
KRELL-FRENCH,
SCHAEFFER,

GILBERT.

As Damp Proof as
Human Ingenuity
can make them!

Krell-French Piano
To Edwin Boone Craighead
President of the University,
this Jambalaya is respectfully
dedicated
Dr. Edwin Boone Craighead
The life of Edwin Boone Craighead began forty years ago beneath the clear sky and amidst the dense woods of Missouri. His mind and character broadened and deepened under the fostering influence of rugged natural surroundings and impressive natural scenery. This excellent educational training performed by Nature was supplemented by an efficient scholastic course which culminated, in so far as his native state is concerned, in an A. M. degree from Central College.

Dr. Craighead was one of those elect few in whom the inspiration of knowledge for its own sake is strong, and he pursued his studies further at Vanderbilt. Yet, not satisfied with the graduate work there completed, he visited the renowned educational institutions of Europe, drinking in at their pure fountains the learning and lore of centuries. Leipsic and Paris were the centers of his student life while on the continent, and when he sailed for his native land he had added a fine capstone to his education.

How varied were the lines of study which he had followed is shown by the different positions which he occupied during his comparatively short but creditable career as an educator. Emory and Henry College, in Virginia, first called him to the chair of Latin which he left to fill the higher place of President of Pryor Institute in Tennessee. The enviable reputation which he here gained caused him to be summoned to Wofford College, South Carolina, to the professorship of Greek. Again he was called away to accept the presidency of Clemson Agricultural and Mechanical College. Here again his abilities shone out so brightly that he was called back to his Alma Mater, Central College, to assume its presidency. But even here his ascent to distinction did not stop. Three years ago Dr. Craighead was elected President of the Missouri State Normal College, where he acquitted himself with such marked ability that he was called upon to fill the high and responsible office of President of the greatest and most promising university in the South—the Tulane University of Louisiana.

He quickly adapted himself to new conditions and speedily adjusted himself to new circumstances. The disorder which was inevitable upon the vacation of the presidential chair he quickly turned to system; the new problems which presented themselves he solved; the greater duties which were his to perform he undertook ably and manfully; the strangers whom he met he speedily and invariably won.

Tulane’s destiny is said to be a high and noble one; her course is a far and brilliant one; with a hand so firm, so steady, so competent at her helm, she will surely weather all gales, ride safely through disadvantageous conditions, and enter unharmed into the coveted haven of achievement.

S. W.
Introduction

A mixture this of all we have
Our joys, our cares, our strife;
Within these cathers you will find
A pot-pouerri of life.

Class Song
Four long years have we spent at Tulane in our life;
Four long years have we worked as a class;
In that time have we met many hardships and strife,
But our trials will end here at last.
It is here at Tulane that great ties have been formed,
Holding Seniors together most dear;
Recollections of pleasure, of joy, will be warmed
In our hearts as we live year to year.

From the Class of '05 many lights, let us pray,
May some day brightly shine in our land;
In mechanics and arts, and in Law every day,
Let '05's at the top always stand.
Alma Mater, Tulane! Thou hast proven most dear,
Thou hast done for us all in thy power,
Now it rests on our shoulders to help every year
Thy fair name in glory to tower. Edw. O. Tabor, '05.

History of the Class of 1905

Out of the strenuous chaos of a dawning century, in the year nineteen hundred and one, rose a dazzling star, the guiding light of a class destined to be great in the stupendous enterprises of a productive age. Rising, ever rising, the beacon of 1905's success majestically ascended the arch of the heavens, passing the intermediary constellations in a blaze of glory unparalleled in stellar magnificence, till, now, in the fourth year of its journey, all points on the intellectual horizon are touched with the incipient tints of mental supremacy. One-half of the first quadrant has thus been traversed and our star is still climbing the heavenly dome above us to a position in the center of the firmament, where it will linger to the end of eternity, shedding effulgent light upon the greatness of a class long before called to the land of its fathers.

From the time the Class of 1905 entered upon its successful career to the present day, the number of members has suffered a sad diminution. However, those remaining are bound together by the close ties of friendship and co-operation. In bidding our Alma Mater farewell, we do so only in a figurative sense, for our future efforts, both material and spiritual, will be gladly directed toward the uplifting and maintenance of her fair name in the eyes of all posterity. The Seniors of nineteen hundred and five have spoken.

Junior Class History

HAT the most memorable date in the history of Tulane University hitherto was Oct. 1, 1902, made so by the entrance into its portals of that astonishing aggregation of virtue, talent, courage, strength, beauty and genius, well known as the Class of 1906, has been made clear by previous historians. The second and last event without parallel in the history of the institution will be the graduation day of this Class of 1906. This will be told by the future historian. It remains for the present historian to chronicle a very few achievements of the year now passing. But where great and noble deeds are the mere common place, where shall we seek for the exceptional that alone constitutes the interesting? We must find it, by all logic, in the little acts, the few performances of the type usual in other classes, indulged in by this class merely by way of change and recreation. But such incidents would have little interest and must be omitted. And so from mere monotony of the extraordinary, the history must be brief. That the personnel of this class is endowed with genius, beauty, strength and courage, is no sense of vanity, for we cannot help it. That our history is filled to overflowing with deeds of unexampled brilliance and success does not make us proud,—it is all so easy, and, incidentally, the other classes are so easy.

Having, by the dignity of our bearing, by the sagacity and wisdom of our appearance, proclaimed abroad the fact that we were Juniors, we proceeded, among other numerous accomplishments, to arrange the subject of Calculus according to our own ideas. There were instances in which even our learned professor was compelled to meditate for weeks at a time before he was able to completely master our new methods of integration. Indeed, so eagerly did we grasp the great difficulties and problems of this beautiful study that the succeeding classes hereafter will be able to complete the subject in a very short time, so thoroughly have the obstacles been removed by our genius.

Since we do not wish to manifest a spirit of boastfulness and do not wish to incur an ill-feeling in our fellow-classes by mentioning a subject which is necessarily disagreeable to them, very little will be said concerning athletics. It was, however, never our wish that our great reputation should so alarm the other classes that they would not even venture to meet us in the usual contests of inter-class athletics. Such, nevertheless, was the case, and many of our famous victories must go down to history as never having been won, for the reason that the battles were never fought, no opponents daring to appear in the field when our banner was unfurled.

The bond which has held this class together is exceptionally strong. Excellent and numerous as we were in the beginning, the quality has steadily improved, while the quantity has scarcely diminished. All have drunk deep of the Pierian spring; and all have felt the glow of the feu sacré.

If this is not sufficiently clear,
"In summer when the days are long,
Perhaps you'll understand the song."

History of the Class of 1907

In writing a history of the glorious Class of 1907, it is hardly necessary to rehearse in detail the deeds of her Freshman year, so well have they been recorded by her historian of that period. In chronicling the achievements of her Sophomore year, however, it might be well to give an outline of the past record upon which her present greatness is founded.

The first day of her Freshman career, 1907 met 1906 in a cane-rush, and would have won easily but for consideration of tradition and the tribulations already in store for the Sophs. The third day, in order to keep the Sophs from being misled as to their true position, she soundly spanked them for being over presumptuous. One morning in November the sun shone on the wind-mill with its alternate blades resplendent in gold and black. This deed, hitherto unaccomplished in the annals of Tulane, was done by 1907. When Tulane night came round, 1907 was the moving spirit of the occasion. On Founders Day it was 1907 that saved the public of New Orleans from getting the false impression that 1906 was running things at the university. After this the Sophs, realizing the power of the Freshmen, retired from the Sophomore business. Thereafter the college enjoyed the unannoyed influence of the most glorious Freshman class that had yet entered its portals.

So much for her past; now let us take into consideration her present greatness. There are three things of which 1907 is especially proud. They are: First, the conscientiousness with which she has taken care of the Freshmen; second, her vivacity, and third, the seriousness with which she has devoted herself to study.

From the very beginning of the present session, 1907 has conscientiously cared for the Freshmen. She has left no stone unturned in giving them a thorough training for future great work, and never for an instant has her thoughtfulness in regard to them relaxed. At the opening of college, realizing the necessity of instilling in boys habits of neatness, she set them on a firm footing with Jupiter Pluvius; and fearing that they should, in the introduction, catch cold, she kept their blood in healthy circulation by massage. Realizing, too, that there are certain fundamental principles by which all children should be disciplined, she has had printed for the benefit of the Freshmen a list of appropriate rules by which they are to govern themselves. Further, realizing that it is unprofit-
able to lay down rules, and not see to their enforcement, 1907 has, on occasions, deemed it necessary to assist the Freshmen in following the narrow path. One notable occasion of this kind was that on which sage 1907 deemed it necessary, as an object lesson to remove derbies from the craniums of two presumptuous Freshmen. Such a head-gear 1907 thought inappropriate for boys as young as the Freshmen.

In the Class of 1907 there is a spirit of gigantic energy of life. It is to this spirit that is due her unqualified triumphs over two most worthy adversaries, 1906 and 1908. It was this gigantic energy which enabled her to remove from the very highest gables of the university seven 1906 standards, and to replace the blue on the wind-mill blades with black within two hours after their appearance. This energy has enabled her to completely control the Freshmen in the face of double her numbers, and it is to it that is due the interest with which she has entered into each Tulane Night. It was on account of this same spirit that 1907 was able to furnish to the Glendy Burke Literary Society both of her representatives in her most important debate, and that 1907 was able to put forth a football team which should so astonish the Freshmen by the score of eleven to nothing in favor of 1907. It might be well to say that, in her victories over her two rivals in the Sophomore-Freshman struggles, 1907 has not been wholly selfish. She has often had the deepest feelings of pity for them in their misfortunes. She has often felt that in a less brilliant sphere they might have shone forth, and she has, on various occasions, where no real harm could be done, allowed them to be victorious.

Thus have I striven to give from an important standpoint a vague idea of the manner in which the Class of 1907 has surmounted the difficulties of her under-classhood. Let us hope that she will solve as successfully the more important problems of her upper-classhood, and that she will accomplish greater achievements.

Freshman Class History

F THE privileges which appertain to the office of Class Historian I value none more highly than the one which now permits me to place upon record my humble but sincere estimate of the worth, as I have learned to know and to appreciate it, of the distinguished Class of 1908.

No class in college has, during its incumbency of maintaining the dignity of Freshmen, been more sorely beset by soul-vexing trials and difficulties, but let us thank God that it had strength above them all, and with patient and undeviating resolution it pursued the even tenor of its way, triumphantly conquering each trial, surmounting each difficulty, and fearlessly and fully discharging each duty as it saw and understood it.

And as we look around us today, we are confronted on all sides by manifold and cheering evidences of the glorious fact that it understood its duty well, and that performance has been on a par with understanding.

As long as the students of Tulane remain true to their college and true to themselves, they must and they will generously and gratefully acknowledge the lasting debt which the student body of this college owes to the unselfish college spirit, to the unerring patience, the unswerving loyalty, the splendid and unconquerable courage of the Freshmen, the glorious Class of 1908.

As they have been, so will they continue to be, the steadfast friends and the courageous companions of the students, who justly feel that they honor themselves when they speak of this class.

Their past records, illuminated by achievements of a notable order, give assurance that they will make good the judgement that thought them worthy of the honor of being called the "Greatest Class of Tulane," for they are made of the stuff which, when occasion demands and duty calls, dares do all that may become a man—and do it well.

ALLAN CHOTARD EUSTIS, B.Sc., Ph.B., M.D., Assistant Demonstrator in the Chemical Laboratory.
In Memoriam

EMILE A. HUSSEY

Of the Class of 1905, who died in New Orleans, September 1st, 1904.

P. LESTANG SARPY

Of the Class of 1906, who died in New Orleans, November 22d, 1904.

"O Death thou art eternal life;
Thou art peace, devoid of mortal strife,
So loved, so hated, and yet, so feared—
Art thou a dragon with head high reared?
No Death, thou art sublimely blest;
Eternal peace, eternal rest."
The Medical Department and Its Professors

URING the year 1834 this institution was founded as the “Medical College of Louisiana,” and in 1847 became the “Medical Department of the University of Louisiana.” In 1884, the name “The Medical Department of the Tulane University of Louisiana” was adopted. It is the oldest medical college in the southwest, and has the greatest number of alumni. May, 1904, it had conferred diplomas on four thousand and eighty-one, namely: On three thousand seven hundred and thirty-seven graduates in medicine, and three hundred and forty-four graduates in pharmacy.

There are eight professors (including Dr. L. F. Reynaud, Professor Emeritus, Materia Medica), four associate professors, twenty-eight lecturers, instructors and demonstrators, and seventeen chiefs of clinic and assistant clinical instructors at the Charity Hospital, making a total of fifty-six.

For the session of 1904-5, there are four hundred and ninety-three (493) matriculates. Of this number twenty-three (23) are post graduates, one hundred and twenty-two (122) are eligible for graduation in medicine.

Pharmacy students number twenty-seven (27).

April 25th, 1904, the Louisiana Supreme Court decided in favor of the validity of Mr. Alexander C. Hutchinson’s will of Nov. 20th, 1902, whereby the Medical Department is to receive the benefit of about $800,000. This addition to the quarter of a million dollars, already invested in the Medical Department, will give to it a greater sum for additional improvements than is possessed by any Southern and by most Northern colleges, so that future students will derive from Mr. Hutchinson’s philanthropic bequest a very great increase in the educational advantages of this college, and its diplomas, past as well as future, will give additional repute.

The Charity Hospital, two squares distant from the college, contains over nine hundred beds, and for the year 1903, the sum total of all cases treated therein was 32,634. In the year 1899 there was added to the Charity Hospital the Milliken Memorial, a superb, modern and model building for the accommodation of two hundred sick children.

The administrators of the Charity Hospital elect annually, by competitive examination in March or April, eighteen resident students from the fourth-year class, who have passed all third-year requirements. These students are entitled to board and lodging in the institution free of charge. The administrators also elect seventeen externes, who serve as assistants in the outdoor clinics.

All four medical classes are required to spend a large share of the time daily at the bedside of patients, where they are instructed and quizzed by a professor or assistant.
Besides this, they have free access to the different wards at all times during the year, which affords a most excellent opportunity for research.

The Charity Hospital is the largest hospital in the United States where students are given bedside instructions, and for the study of diseases of the South and Southwest, is without doubt the greatest place in the world.

To the fame of her professors throughout the country—yes, throughout the world, and to the practical experience given in the Charity Hospital, Tulane owes the value of her medical "sheepskins."

Dr. Stanford E. Chaillé, our dean, has been connected with the Medical Department many years. He has given the best of his life in faithful service and loyalty to the position of trust which he holds. Each succeeding year has brought added responsibilities to him, and as these responsibilities have piled up, his head has grown whiter and whiter, until now there isn't a strand of black to silhouette against the whiteness. And while he has passed the allotted three score and ten by several years, he is an old man in years only. His step is firmer and his eye brighter than many a man of forty. He is hale and hearty, and every day he may be seen tramping off six miles "like he is paid for it." The weather must be inclement, indeed, to keep him indoors and prevent him taking his "six-mile jaunt." He climbs three flights of stairs just as regularly as his students, and with as little effort. He is punctuality itself, and he will not tolerate laziness or slothfulness in any form. Two of our greatest dreads are: Professor Chaillé (in examination), and Dr. Chaillé (Dean).

A universal favorite, abrupt and to the point, yet gentle and considerate, an evolutionist with facts and arguments to convince the most skeptical; an unexcelled success as a spinner of smutty yarns; on the most profound subjects he holds his audience spell-bound—charmed, with his reasoning and wit. And yet, with all his perceptiveness, he is sublimely unconscious of the fact that the boys simply worship him. To us his hoary locks are as a crown of thorns endured through years of constant upward toil; the penalty for being honest and faithful and bearing others' burdens.

To us he is a god—a man; not going to heaven—not afraid of hell. And when Dr. Chaillé vacates the dean's chair, there will be regret, strong and genuine among the students and alumni, for while it is possible, it is not probable that his successor will be the popular dean as well as the strenuous dean. The most we can hope for is to emulate Chaillé. This is worthy of a noble effort.

Professor Ernest S. Lewis.—A man with a big heart and a glad hand. Never too busy to tell a good story, but "he must have fresh air." A popular man with the ladies—and an expert. We of the South recognize him as authority, but he is the mortal dread of Seniors. Any physician who is not thoroughly familiar with his "quilling" process is handicapped, and should acquaint himself with the method at once.

Professor Jno. B. Elliott, Sr.—The man who dishes out "Theory and Practice" in great gobs, and gives sodium sulphite by the dipperful. And woe is he who doesn't know that the Stegomya carries yellow fever and that the Anopheles carries malaria.
His theory of immunity and the blood count are something fierce, but you've got to know 'em to get that coveted sheephide. He is appropriately classed with the great and the good.

Professor Edmond Souchon.—Every spring he gives jobs to the Seniors; about the same time he gives h—l to the Sophomores. Nobody knows anatomy better than Souchon, and nobody demonstrates its "peculiarities" better than he does with his lantern slides. A surgeon of great renown; an excellent man. President of the Louisiana State Board of Health. Possibly this accounts for his non-belief in the mosquito being the sole method of conveying the germ of yellow fever.

Professor Louis F. Reynaud.—For eleven years he was connected with the college—resigned his chair in 1904. He was one of the best friends of the students; ready and willing to help them at all times, his advice was much sought, and it has been said that he didn't have an enemy in the world. His goodness of nature and his great ability as a clinician, inspired all who knew him with admiration and respect. For several years his health had been failing under the constant strain of lecturing, and we had expected his resignation a year or two previous, nevertheless, when the announcement of his resignation did come, it was received with deep regret, for all who knew him loved him.

Professor Rudolph Matas.—A man with the energy of ten ordinary men—busy always. Well informed on all subjects; a voluminous reader, an excellent conversationalist, and with principles utterly devoid of unfairness. He has a most profound respect for "technique," and his operations are beautiful illustrations of modern surgery. He gets more work out of the Juniors than everybody else together—and then he's not satisfied. He would take the paltry few minutes left them if he could. His course in surgery is not excelled by any in the country, and his fame is far reaching. His "Incise freely" is characteristic; it is also the terror of his patients.

Professor A. L. Metz.—The ugliest man in the faculty, with a proboscis that is the pride of him and "his boys." It is also a phenomenal smeller, instantly detecting the faintest odor of putrefaction in the student body. Annually he says we can't have punch next Founders Day. A man who has seen the world in all its phases—a self-made man who today is one of the world's authorities in medicolegal cases, and who is justly proud of his course in medical jurisprudence. He is an expert chemist and a most excellent teacher. He is Professor of Chemistry. During the four years he gets more work out of us than any other member of the faculty. In a crisis the boys can depend on him to pull them over.

Professor Jno. T. Halsey.—This is our first experience with Jno. T., and we mustn't say anything real bad about him—he might get angry. But his "Kenney" does grate harshly on our Southern ears and his frog lob tickles our palates. He came to us this year and told us that we must study. We thought he was joking; but after noting that he flunked about forty, we believe that he meant it. He does not hold examinations without notice. A thorough gentleman at all places and at all times. He spent years preparing himself, and right here let me say, "There isn't a more competent clinician in New Orleans than Dr. Jno. T. Halsey." But he does look funny floundering around in a sea of malaria. Possibly he never saw a case before he came to Tulane.
Hobble Gobble! Razzle Dazzle!
Sis, Boom, Bang!
Hit the Grit! Burn the Wind!
Medical Gang!

Cut Glass Grey and Cherry Red.
History of Class of 1905

It CAME to pass in the sixteenth year of the reign of Chaillé, the Great, while Metz, the modest, whose surname is Truthful, was still dispensing pneumatic lectures concerning the love wherewith he loved "his boys," that there assembled together a great number of young men at the Medical Department, who, because there had been none like unto them before, neither should any come after that should equal them, called themselves the Class of 1905.

These self-same young men were Freshmen the first year because they had never before faced the man who smiles like a volcano when he murmurs, "Have you got the money?" Neither had they heard that time-honored "Address of Welcome" which hath inspired unto snores the latent abilities of three generations of credulous students.

After the "Address of Welcome" had been shown due respect, on account of its age, and the applauding palms had lost their soreness, the class discovered that they were democratic and must needs have a president to steer them up against as much trouble as possible. Following the precedent established when Jonah swallowed the whale, they cast lots and lots fell on a young man who had black hair and smoked a pipe. This black-headed young man with the pipe soon showed that he had rare ability as a diplomat and could also do a few pneumatic stunts that showed that he was fast learning the ways of a professor. Under his enterprising rule the class continued to be Freshmen and strove most diligently to acquire enough big words to find out what the lecturers were talking about. This strenuous search continued until the strenuosity of it began to cause neurotic symptoms to appear in the faces of some, while the outcome of the races showed more plainly on other fair countenances. When the balmy spring days began to appear, some of the poetic members of the class discovered that "case" rhymed with "base" and "call" rhymed with "ball," so a body of nine of the more poetic appointed themselves a committee to study this sort of poetry and report to the class the results of their scientific research. Their investigations were carried out under the difficulties of having classes to come at the wrong time of day every day of the week and examinations finally put an end to their labors before the report had made any great headway. After the session's work was done and "exams" were over the boys dispersed to their respective homes to pursue the chase after learning which they had carried on so untiringly during the session, and all swore to be back next time early enough to pay their respects to the "Address of Welcome."
The Sophomore year of the Class of 1905 was remarkable for the fact that nothing remarkable transpired during that year. A president was chosen because he was needed to carry the troubles of the class. This time lots fell on a young man whose hair was black and curly, and who did not smoke a pipe. He soon showed that he was as wise as a sphinx, for he “said nothing and sawed wood.” Under his rule the class worked and grew knowing, accumulating a stock of “peckylarities” that was a joy to relate. It was during this year that the Faculty tried to see if they could work the class to death, but found that they had underestimated the appetite of 1905 for good, hard, laborious labor. The president, who was a very modest young man, and never insinuated himself into circumstances where he was not desired (which being interpreted so that the way-faring man, though an academic student, may know, means that he did not “butt in”), set the pace for the class by showing the amount of work he could do, and the class strung along in his wake like a bunch of good little lambs. 1905 was fast acquiring the reputation of being capable of doing more work than any class that had gone before them, and even had time to play tennis and baseball while the professors were thinking of something new to tell them.

The most uneventful year of the life of 1905 was the Junior year. This time the “Address of Welcome” was getting so old that it tottered when it was lead out to do its little stunt, and if it had not been doing that little stunt for so long that it had become automatic in its performance, it surely would have failed from senility. This time there was only a hushed applause for fear of waking those who were asleep, and the noise of hearty applause might have proven too much for the aged harangue to stand.

The president of the class was chosen because he had neither hair nor youth, and because of the respect which the class had for the aged. During this year the amount of work to be done was gradually gone through in that thorough manner that is characteristic of 1905 in all its undertakings. The study of poetry was resumed by the baseball committee with more favorable opportunities than during the previous sessions. During the latter part of this (Junior) year some of the young men of the class became so expert at high vaulting that they were thought to be sufficiently proficient to jump onto an ambulance and were admitted as internes to the Charity Hospital.

The Senior year was the one that was to amount to more than any other with the class, for they were to be given a mutton hide with a seal on it, and the signatures of the professors who had made the boys hustle for the past four years were to be pasted on one corner of the cuticle. This year the “Address of Welcome” was dragged out and dusted off, a new ribbon was tied about its neck and it was put through that same old performance that is so familiar to the students, in which it flaps one paw up in the air and then wiggles.
its nose and then turns sidewise and flaps the other paw at the crowd. (Now that some money has been willed to the Medical Department they will be able to blow themselves for a new "Address of Welcome," and it is to be hoped that there will be a tablet erected to the memory of the one that has served so faithfully and so long). The Faculty showed their appreciation of the amount of work that 1905 had been doing by adding two more lecturers to the list that had been lecturing to previous classes. Each of these new instructors brought with him an "ology" that he swore was the most important of any that had ever been presented to a lot of suffering students. This year the class president was chosen because there was nothing peculiar about his hair and also because he had a majority of votes at the election. His manner of handling the Faculty has been the striking feature of his term of rule and if they continue to do as he tells them, there will soon be turned out from the Medical Department the best drilled and best qualified class of men that has ever gone out from that honored institution, and the faculty will be proud to say that the members of that class were among the students they once instructed.

History of the Class of 1906

In taking upon himself the task of chronicling a few facts about the Class of 1906, its historian would rejoice if it were possible for him to give an individual sketch of every man whose name appears upon its roll, knowing how rich such a record would be in examples of duty performed, obstacles overcome, and success achieved. But he must forego this pleasure, and content himself with an attempt to make a brief sketch of the class as a whole, reflect in some small measure some of the most striking characteristics of its individual members.

In looking back over the career of the class since its organization in the fall of 1902, we find that while there have been times for rejoicing and times for regret, yet the successes have outnumbered the failures, the victories have overshadowed the defeats, and there has been steady progress in the mastery of those principles and the acquirements of that skill which will bring rich rewards in the years that are to come.

In all phases of college life the Class of 1906 has made itself felt as a factor of power and influence. In class-room work, while our record is not always brilliant, yet the memory of it will never bring the blush of reproach to our cheeks. It is true that at times our quiz answers have wrought sad havoc with the peace of mind of our beloved dean, but it was because in his presence the emotional strain of the moment put our reasoning power to flight. We were at times noisy in the microscopical laboratory, but it was possibly due to our unrestrained enthusiasm over the marvelous sights revealed to us in the microscopical world. We sometimes sleep in the lecture room, but it may be because we have been too zealous in our work the night before, and have burned our lights to the wee sma' hours.

In a political way we number within our ranks some geniuses of the truest type, and most ardently and faithful do they labor at certain seasons, with the happy result that our offices are always ably and amply filled.

In the realm of athletics we have done little. We have no practice field of easy access, and would be handicapped in any efforts we might make in that direction. But the fact which is most largely responsible for our lack of achievement in athletics is that so many of our men feel that they are now face to face with the more serious things of life, and that their time for play has passed. They believe that the dissecting room is of more importance to them than the baseball diamond, and that the hospital ward promises richer returns than the gridiron.
Yet, we have not been without our heroes of brawn and muscle. And while my reader may be surprised to find in the history of so civil and peace-loving an organization as a medical class, a record of martial achievements and victories won on the field of battle, yet we have had here our champions. And this history would be untrue and incomplete without mention of those two memorable occasions when the bloody field of the tennis court witnessed the standard of 1906 waving in triumph over the prostrate forms of its conquered foes.

In its varied personnel, our class furnishes as many interesting types as could be found in any similar organization. We have the Jew and the Gentile, the Frenchman and the German, the Russian, the Spaniard, the man from the North, the East, the South and the West. We have funny men and serious men; handsome men and ugly men; brilliant men and stupid men; men who are always at their post, and men who are never there.

But the source of our greatest pride is the fact that within our ranks are numbered so many men who realize with Edison that there is more genius in perspiration than in inspiration,—men of unfailing energy and untiring industry, who are ardently, yet cheerfully putting their whole strength into their work, seeming to have caught the spirit of Carlisle’s words: “Blessed is the man who has found his work; let him ask no other blessedness.” And if the historian may for the moment assume the role of prophet, he will say that for these men the future holds lives of noble achievement, and rewards rich in material wealth, and in the love and admiration of the thousands whose suffering they will have relieved, and whose lives they will have brightened.

Earl Wills Anderson, Historian.

History of the Class of 1907

In the year nineteen hundred and three there came a crowd to the closed portals of this grand institution, a gang of geniuses who wooed alike the race track and the lecture room. This body of men was of a most representative type, for all corners of the globe had followers.

Professor Metz recognized the value of such a distinguished body at once, and invited them into the assembly room to listen to his famous lecture on “Us Don’t Have Any Trouble.”

After this intellectual feast the boys shook hands, called each other “Doctor,” compared notes on desirable boarding houses and went off in search of new homes. After being comfortably situated they settled down to work.

The class numbered about eighty and was composed of men who had fulfilled all the requisites of a splendid education. Refinement, gentleness and unusual brightness of intellect is the only possible diagnosis after a close inspection of the Class of 1907. Its members are gifted with those precious qualities that make some men so far superior to the rest, and their stately men and intelligent expression puts the noble chanticleer to shame; these “characteristics” have their “peculiarities” and ought to be considered “unique.”

A meeting was held shortly after the opening of the session in which oratory flowed like water. After the smoke of political battle had cleared away, it was found that a full set of officers had been elected. The president immediately seized the reins of government and appointed committees, one of which has to its credit the selection of the most beautiful class pin in the university.

The members of the class were soon linked together by the sacred chain of friendship, and the most perfect harmony has prevailed.

The professors and instructors showed them many favors, and to this stimulus is due the success of the class, and as a reward of their efforts the class picture will be hung on the “Temple of Fame,” New York City.

Before the close of the session, the class was attacked by a most terrible germ, “Politicoch.” The ravages of this disease were terrible, but not daunted, the Sophomore class is again at the topmost round in the ladder of fame.

After a most pleasant summer they returned to college with a grand determination to be an honor and credit to their institution. Their fame had spread abroad during the holidays and young men from all over the South, having heard of this magnificent class, have had their names enrolled upon its golden register. They, too, have evinced great interest in their class, and every new member is a star of the fifty-first magnitude, and with one hundred and twelve stars the Class of 1907 is a constellation among the classes.

Aesclapius, from his bejeweled throne on Mount Olympus, looks down with admiration upon the Sophomore class and pronounces them as his worthiest sons, for their pathway has been strewn with pearls of success and the victor’s crown awaits them in the “Temple of Knowledge.”

EUGENE DE BELLARD, JR., Historian.

History of the Class of 1908

The illustrious Class of 1908 was launched into the mysteries of this world on the memorable day of October 20th, 1904. We (in other words, Metz's babies) were born 118 strong and can boast of more variations than any other class in college.

It was shown at the very start that the class was made of fighting material, at the election of her officers. The fight was so hotly contested that it required three meetings to land the successful candidates.

F. F. Long, the Alabama Senator, was landed safely in the chair and has certainly shown 1908 some wonderful things. He, with his magnetic appearance and gentle voice has been of invaluable service, and we sincerely regret that his term expires so shortly.

On the night of Dec. 3rd, 1904, our class was most royally entertained by Dr. and Mrs. Metz, at their elegant home in Rosa Park. Right here let me drop a word to all those who may come after us in the study of medicine at Tulane. Whenever you have the blues or feel downhearted, or home-sick, go to Metz's and be cured.

Our class has held up the standard of all previous first year classes, in regard to examinations. Over 70 per cent. of the class passed Sir Hopkins' examination in physiology and hygiene.

While our class was not represented on the football team of last season, we will be in the game next year. We have with us Watkins of Sewanee, who played center on that team last season, and also made the All Southern. We are glad to have him with us and are expecting great things of him next fall. While our friend Watkins has been trained and understands the game thoroughly, we have others who, with a little work on the gridiron, will easily make the varsity.

I have been requested to write something about the handsome men of the class, but as we have none who are worthy of mention in that capacity, I will postpone it to a future time; in the meantime we will await developments.

But when it comes to politicians, we are greatly blest. Every one of us is a politician in some sense of the word. Of course, we, like all other distinguished bodies, have our leaders among us, Long, Leake, Philipps, W. D., Lamot, Mitchell and many others.

So ends the history of the Class of 1908, and, my dear classmates, let us hope that our coming years at Tulane will be as enjoyable as the closing one.

Historian.

A Short History of the Ambulance Corps

PREVIOUS to the year 1885, all sick and injured people were conveyed to the hospital in city wagons and various vehicles improvised of every fashion. This, at least, was detrimental to the chances for the patient’s recovery, if said patient was severely shocked before the journey to the hospital was begun.

Acting upon the suggestion of Dr. A. B. Miles, in his annual report as House Surgeon of the Charity Hospital, it was determined to establish a service by means of which the injured could be given immediate medical attention at the place of accident, and conveyed to the hospital for further treatment, if it was deemed advisable, or to their homes. This was accomplished by the inauguration of the ambulance service.

Dr. A. B. Miles, in his annual report of 1885, speaking of the ambulance service, states as follows: “This service organized on the 2d of February, is working satisfactorily. Its success is due mainly to the competency of the ambulance corps, and the zeal with which they discharge their duty. Lives have been preserved by the prompt aid rendered
on the spot in cases of poisoning and surgical accident." This service has been main-
tained out of the general revenues of the hospital, but at times, donations have been sent
to be used as a special fund for this purpose. Two ambulances were used from the
beginning, but since then, a third, to be used in case of emergency, has been purchased.
These ambulances have been in daily use since Feb. 2, 1885.

Now, a few words relative to the organization of the ambulance corps. When first
organized it consisted of fourteen members; at present it consists of sixteen. These men
are known as ambulance surgeons, or internes.

The position of interne or ambulance surgeon is not the first thing that a Tulane
first-course medical student obtains, as the public in general think. Indeed, the position
is one of greater importance than this, and one about which the laity know very little.
An interne position is obtained by competitive examination. Only third and fourth
course medical students of Tulane University are allowed to compete. This opens the
field to 200 or 250 men. From the results of the first examination, a certain number of
men are chosen who are requested to appear for a second. From this last examination,
the number of men corresponding to the number of vacancies for that year, taken in the
order of their grades, are recommended by the Board of Examiners to the Board of
Administrators for appointment. In each examination, one question from each branch
of medicine is given, and in the first, several practical cases are given to test the degree
of practical knowledge the applicant possesses.

Having succeeded in obtaining this appointment, an interne is forced to reside at
the hospital, and is subject to call, day or night, to any of the duties assigned to him.
Each interne is assigned to certain wards and clinics, over which he has complete control,
under the supervision of the house surgeon, his assistants, and the visiting staff. Besides
this daily inside work, as ambulance surgeon he serves 48 hours continuously, out of every
eight days, on ambulance duty. During this time he treats all emergency cases and
answers all ambulance calls. This appointment is good for two years. The sixteen
internes, two assistant house surgeons, and the house surgeon, compose the resident staff.

The ambulance service has been brought to such a state of efficiency by each suc-
ceeding house surgeon, that at present it is an absolute necessity to the public, and indis-
penensible to the proper workings of such a magnificent charitable institution. It is second
to none in the whole United States.
NEWCOMB COLLEGE
Professors and Instructors

BRANDT VAN BLARCOM DIXON, A.M., LL.D., President of Newcomb College, and Professor of Philosophy.

Class Poem

Serious, sensible, jolly and fair,
Earnest, impulsive, high-minded and true,
Naturally happy, of cheerfulness rare,
In truth, just mere words can't describe them to you;
On account of their learning they've won great renown,
Right worthy are they of the "Cap and the Gown;"
So, three cheers for the record the Seniors hand down.
A History of the Class of 1905

The history of the Class of 1905 begins with the settlement at Newcomb of various Freshmen from the States of Louisiana, Mississippi, Florida and Alabama, in October of the year 1901. While yet a green and timid people they invaded this new territory, content for a while with merely holding their own and making no aggressions on neighboring classes. But when once this timidity had grown into assurance, and the new members had acquired the virtue of "sticking together"—that virtue which for four years has been characteristic, and has brought victories in dramas, literature and athletics—the natural contest for supremacy began. It has been a many-sided contest and now, almost at its close, I think we may honestly, and not boastfully either, say that we have made ourselves masters of our college world.

The first decided victory for the 1905's was on the Field of Drama, where, though Caesar's horse was only a hobby, all of the enemy at Philippi fell together, and the victory was voted to be the most noteworthy that had been won on Newcomb soil. The leaders of this great conquest were warriors from Florida, one of whom has followed victory with victory until in her Senior year she has been chosen president of her class.

It is not a fair history which passes over unnoticed the struggles and failures of a people. So this will record the defeat of 1905 in its first battle on the Field of Athletics: in its Sophomore year the flourishing band gave way before a more practiced and skilled people. But there was neither retreat nor despair, merely a bracing-up and a resolution so strenuously lived up to that in its Junior year the team broke every Newcomb record, and carried off as trophy the hard-earned and hotly-contested championship cup. The band was led by the same captain who now stands at its head, and who will "hold her own" irresistibly until the cup is again, and for the last time, carried off by 1905.

I know they were said to be "frivolous"—this fun-loving class—and not perfect models of the sober and dignified seekers after knowledge. But one proof will be sufficient to show that a healthy body was valued as being the perfect affinity of a healthy mind. For it was in that same all-glorious Junior year that 1905 changed the usual run of things, and the Seniors were worsted on the debating stand by the "Woman suffragist" who "trailed in the dust" the banners of former non-believers and opponents. And though the four-year history of 1905 has been everything but a fable, I can not refrain from drawing just one little moral which, among many other important lessons, must be taken away from their college life by the girls of 1905. They must meet defeat individually as bravely as they have met it as a class, and they must receive victory as unboastingly and modestly as they have individually and collectively, from the moment of their first triumph until their appearance in the garb of Seniorhood—the long coveted and triumphantly realized Cap and Gown.

Historian.
"I predict," said the one who had far-seeing eyes,  
"That this band of Minervas who are soon to arrive,  
By their originality 'll cause great surprise,  
And leave for all ages the deeds of '05."

A REALIZATION  
(The Present 1905)  
Would you believe this was said in the year 1901,  
When our real work at Newcomb had scarcely begun?  
And now in reviewing the things we have done,  
The good we've accomplished, through hardships and fun,  
We predict that life's struggles will overwhelm none,  
Because of the battles we've all fought and won.

AN APPRECIATION  
(The Future, 1910)  
"Advance and achieve was the standard they raised,  
For four years they kept it, brave hearts, undismayed;  
And we, too, by all shall be honored and praised,  
If we play life's drama as '05 has played.

Who is She?

She has "two lips, indifferent red; item, two grey eyes, with lids to them; item, one neck, one chin, and so forth." She is cheerful, sympathetic, unselfish, enthusiastic, athletic and highly intellectual.

She has two generous foes, 1905 and 1907.
She has two staunch friends, 1904 and 1908.
She never cuts chapel, gym, nor classes.
She never creates a disturbance on the arcade.
She never attempts to paint the college red or any other color.
She always remembers that there are trash baskets on the campus.
She always pays her class dues—when misfortune overtakes her.
She knows the exact location of every mountain range, river, city, and town, including Waterloo.

She has invented the phrase, "the English Channel is shallow in width."
She knows more about brachiopods, trilobites, ichthyosaurs, and rocks, than Mr. Dana himself.

She has made an interesting discovery as to the meaning of mummery.
She adores Math and German; while Latin is a pleasant relaxation after one whole hour of Spanish or Art.

She can make worse puns than Dr. Dixon's.
She has the histrionic ability of a Bernhardt, a Mansfield, a Sothern, and a Jefferson.
She is the "pride of Newcomb's Faculty."

Why say more? She does the things that have been left undone and never does the things she ought not to do.

Who is she? Naughty Six.

GREAT SOPHS
From Little
FRESHIES' GROW
History of the Class of 1907

In October the first, nineteen hundred and three, the Class of 1907 came to life. Everything was in readiness for the new infant. The other classes stood waiting around, and the green of 1906 still lingered on the campus outside.

But, lo! A surprise was in wait for all. Instead of an ignorant Freshman baby, 1907 sprang forth full-fledged like Minerva from the brain of Jupiter. The Sophomores looked abashed to see a younger class so superior and the Juniors held out the hand of friendship to their new sister.

All through her initial year at college Minerva II. lived up to her promising first appearance and during this term she is even surpassing it. You must be wondering what some of our famous exploits are.

To begin at the end, our latest and greatest achievement was beating the Juniors in one of the best basketball games ever played at Newcomb. We are the only Sophomores who have even been victorious over an upper class. Isn't that something to be proud of? The ambition of our life at college is to win the championship cup. We still have the Seniors to beat—but we'll hear the end of the story later. They say pride comes before a fall, so we will not boast.

Then our class play last year was another triumph. The best I can say is that it was quite worthy of nineteen seven. Our play of this year is still with the cup in the misty future, but you may be sure it will be a good one.

Besides these things, we have performed other notable deeds. We have numerous and sundry times been victorious in locker room fights, and we have subdued the Freshmen so that they are forced to acknowledge our exalted Sophomoric rank.

Time and space forbid that we should go into further detail concerning ourselves, but we hope that this short sketch will suffice to give you a slight idea of the greatness of our illustrious class of nineteen seven.

Historian.
Class of 1907

When the world was young,
When time was a youth,
When women were angels,
When men stood for truth,

There existed a college
Of learning untold,
With towers and turrets,
And pillars of gold.

Therein were three classes
Of different degree,
These boasted of lasses
Of high pedigree.

Seniors, Juniors and Freshmen,
Their ranks did comprise,
The latter were youthful,
(Please hide your surprise).

But in process of time
The Invincibles came,
And a new class arose,
But without a new name.

Too clever for Freshmen,
And too gifted by far,
To be mentioned with Juniors
(Don't they give you a jar?)

Too young and good-looking
To be classed with that band,
Who with gowns wildly floating
Roamed over the land.

But the oldest professor—
A sage of great fame,
At last answered the problem,
And gave them a name.

Said he: "As Sophia
For wisdom doth stand,
Sophomore surely fits them,
Sophs, I'm yours to command."

Class History of 1908

NEWCOMB has cause to remember long the glorious first of October, 1904. For on this day there entered a class whose brilliancy and spirit have never been and never will be equalled in the history of Tulane University. Never were there such girls, and never were done such noble deeds. So strong is the innate sense of this most wonderful class that not once has 1908 suffered from inexperience—that malady so common to ordinary Freshmen. Far from succumbing to the evil results of verdancy, we have instead caused others to suffer from the intense light of our brilliancy. All Newcomb is dazzled by the glow.

Reluctantly I write such seemingly exaggerated praise as the above, but my duty as historian bids me set forth the truth—however flattering it may be, and however modest I may feel about the achievements of my class.

Thus to continue, the Faculty hold us in highest esteem. There is not a professor who is not delighted when a division of 1908 enters the room to recite to him or her. This is but natural; it must be so great a relief—so great a change for the better—for one who has just heard the lessons of some other class, 1907 for example, to hear ours, well learned and well understood as they always are.

But enough said of our intellectual superiority; you have doubtless, gentle reader, already heard from other sources much more about it than this whole book could contain.

Now, as to our traditional foes, the Sophomores. Of course, you know of our fights with them; how we fastened their lockers and hid the keys, and how in revenge they thought they would shut us up in the locker room. But there they reckoned without their host. They did succeed in entrapping three or four of our number, but these the rest of us immediately went about to rescue. We could not force the door, so we went around under the window and put up a ladder. One of the '08's was about to climb down by means of it when overwhelming numbers of Sophs came, and, with a great struggle, bore it away. They left us, but we were not, as they thought, at the end of our resources. Ah, Sophomores, you learned a thing or two that day. We piled up tables and chairs and the girl at the window jumped. She landed safely and triumphantly just as the Sophs came hurrying back. They were defeated and, in acknowledgment of the fact, they unlocked the door and thus allowed the remaining Freshmen to leave the room in the usual dignified and conventional manner. This is but one of many incidents which go to prove that 1907 cannot impose upon 1908—the former think that they have to deal with the same kind
of Freshmen as those Newcomb possessed last year, and in this mistaken idea they have more than once came to grief.

Ah, gentle reader, I would I could continue forever in the narrative of 1908’s deeds of prowess, but unfortunately, space is lacking. So, in the name of our great and glorious class, I must bid you farewell till you come, sometime in the spring, to witness the best play that was ever produced; a play chosen by the 1908’s, and written by a 1908.

---

**To ’08**

To thee, O mighty Class of 1908,
In a most learned college, wisest class,
To thee I pledge a love that ne’er’ll abate,
Long after I from Newcomb’s walls will pass.

To be thy worthy member I’ll e’er try,
Though to be that I know is hard, indeed;
Since thee to equal, other classes sigh,
For thou in wisdom other classes lead.

Oh, nineteen eight! Indeed, a great class thou;
And oh, thy future seems so bright to me,
If only things will always be as now,
I’ll have no more to wish for, as to thee.
If thou’lt fulfill the promise of this hour,
Thou’lt prove thyself proud Newcomb’s fairest flower.

History of the Class of 1904-05

ON THE twenty-first of last November, the eighty-six men who compose the great class of nineteen four-nine-five, began the great charge up the paths of legal knowledge to capture and occupy the Supreme Court of the land.

Dean Hall in his opening talk told of the high requirements of the lawyer of to-day. But he also cheered us by telling of the high place we would take in the affairs of the State, and even of the Nation, if we became judges and succeeded in our Charges. He finally presented us with the most dangerous and effective weapon of the lawyer, the Code of Practice. He said that if properly used and understood, this book, with the aid of another infernal machine, the Civil Code, would win the fight for us.

Although he did not say it in so many words, his talk left us with the uncanny feeling that these codes could be of great service to us, if properly used and understood, but if a single article in their make-up were overlooked they would immediately become more dangerous to the owner than to anyone else, and would surely result in our losing the action.

As soon as we became acquainted with one another, we realized that we must elect a leader, or president, and have permanent organization. Therefore, Mr. Dupre was elected temporary chairman, and the campaign was started with four tickets in the field. The contest was very close, requiring three days to complete it. After the two weakest tickets were dropped, the fight became fast and furious, and the two candidates, Mr. Garland, of Opelousas, and Mr. Smith, of Orleans, were boosted up to have a look at the skies by the orators of their respective parties. The members of the class finally persuaded these effusive fountains of oratory, that, although Mr. Garland and Mr. Smith were both worthy of keeping their lofty seats, they were needed to lead the class. So the gentlemen were allowed to return to our midst from their stay among other heavenly beings.

Mr. Smith was finally declared elected by a fair majority, and in his speech of acceptance he assured the class that while he had enjoyed his visit and stay among the skies, nevertheless, he was honored and glad to return to this common-place world to act as president of such a class.

The reader must not suppose that we are merely students and grinds, incapable of having a good time. Of course, our greatest joys are derived in the mastering of complex legal subjects, but we vary our amusements. This was shown, and our ability as entertainers established, at the annual hop given on Founders' Day.
As the history goes to the press, the question of who will represent the class as valedictorian is being discussed. Judging from some of the men entering the contest, it should be very close. Anyone who expects to attend is advised to come prepared for a sudden rise in the temperature, as we have inside information that the air will be warm, if not positively hot, on that occasion.

With most classes this part of the session has witnessed cramming and worry over the great final test to come when we have to pass in review before the Faculty. But with the present class this is not the case; we look forward to the examinations with confidence, and our only fear is that the Faculty will do away with them as unnecessary. (The members of the Faculty will please not read the above paragraph.)

Anyone having suffered from the effect of hot air caused by reading the above, will present his claims to Denis, the "student," not the "lecturer."

**Artist.—** Fine paintings, gentlemen,—this one—"God Bless Our Home."

**Lean.—** Country Law Student.—Say (pause), got one, "Goll Darn Our Boarding House"?

OUR GREATEST FRIEND
OUR HARDEST BOOK
The Song of the Epicure

If chests of gold or wealth untold
Release from death could buy,
My blessed share, I'd watch with care,
And guard with sleepless eye.

And when grim death, with oppressive breath,
Would come on the fated day;
Release should I gain, and a new lease obtain,
And send death, crestfallen, away.

But since man can't for pelf, purchase life for himself,
Of what use is money to me?
If I'm fated to die, now say, why should I
With sighs and laments troubled be?

Be it mine then to quaff, with a jest and a laugh,
The wine as it sparkles like dew,
Just add to these three, and complete all will be,
Some friends who are tipsy and true.

Sol Weiss, '05.

Glendy Burke Literary Society

The Glendy Burke Literary Society was founded January 21, 1880, and was for a long time the only thing of its kind at Tulane. It numbers on its rolls now, twenty-four generations of alumni, who are making the name of Tulane famous, and in the list of honorary members hung in its hall, may be seen the names of many of the most prominent business men in the city.

Although there have been no radical changes in the constitution of the Glendy Burke, there are several improvements on the former customs of the society. In the first place, manual initiation has been abolished, not as an inducement to membership, but because it was thought that it was more in keeping with our character, as a dignified body, assembled for earnest purposes, to have the initiations of a literary character. Accordingly, the only ordeal preliminary to membership is either a declamation or an oration, in place of the former paddlings and duckings.

The past year has been an especially important one for the literary societies of Tulane and Newcomb. Acting on advice given them by former members of the Tulane Magazine Board, they re-organized the magazine under the name of the Tulanian, and it is now flourishing under their joint auspices. As membership of the editorial boards is limited to the literary societies, there is an increased incentive towards joining in the forensic work.

This is only one of the advantages, however. It is recognized by all prominent men that the training given by a literary society is one of the most important things given in the college education. The ease and fluency acquired during student days is of use to a man during all the rest of his life. We have been singularly fortunate so far in having presidents who have recognized this, and it is to be hoped that in the future, as in the past, one of the noblest ambitions of the head of Tulane will be to have his name inscribed with those of other illustrious ones, on the list of honorary members of the Glendy Burke.

The Forum

The name of Roman was once the highest title and the most honorable distinction in the ancient world. That word signified greatness, achievement, fame, glory and success. And today in our little college world the name "Forum" signifies as much. The epithet stands for all that is high and noble, energetic and successful in forensic and literary life at Tulane. Born but five years ago, the Forum has already assumed its place of leadership. Ever since its foundation, its halls have rung with an eloquence in oratory and debate never realized at this university before, and on every occasion, when in contest with Glendy Burke, the high standard of excellence of the Forum has been most telling. But there is an adequate explanation for her success; it lies in the fact that unceasingly from the first meeting in October to the jollification in May, there is present in the Forum Hall, a spirit of determination and seriousness that must result in victory and success alone. It is this spirit instilled by its founders, inherited by the junior members and by them cultivated that has made the Forum a permanent and powerful factor in Tulane forensics. Perseverance, grit and earnest endeavor are the secret of the Forum's success.

Urged on by the vigor of youth and the ambition to succeed, the Forum has won laurels, such as few organizations can boast. She has met her sister society five times in
debating and oratorical contests, and not once has she been defeated in debate; only once did she lose the medal for oratory. Beginning with the second contest, a silver loving cup was put up as a prize; the society winning three victories with no intervening defeat, to have permanent possession of the cup. In 1902 the Forum, represented by Messrs. Itman and Goldstein, won; in 1903 Messrs. Veith and Powell received a “tie” decision; in 1904 A. Giffen Levy and Sol Weiss gained another victory, and in 1905 the Forum was once more piloted to victory by Messrs. Edw. O. Tabor and Sol Weiss, thereby gaining the final and necessary victory to retain permanent possession of the cup, which now makes a handsome ornament for the Forum Hall. The medal for oratory this year was won by Mr. St. John Perret, also of the Forum. Is this not a history of which every Forum man can be justly proud?

Two years ago the Forum furnished one man for the Tulane-Texas debate, last year one Forum man made the team and one was alternate, and this year it promises well to furnish all three men for the Tulane team. This showing demonstrates that to the Forum, debating is a serious matter.

Mention should be made of other events in the society’s life. We have at last a home for the Forum, which will shortly be suitably furnished. The two literary societies of Tulane, together with the Agonistic of Newcomb, have done a great service to Tulane by organizing and publishing a university magazine—“The Tulanian.” The first editor-in-chief and business manager were both Forum men. That the undertaking is a success is proved by the excellence of the magazine. The membership of the Forum is exceptionally large, and made up of hard working and earnest fellows. We might continue to sing her praises, but our tale is well summed up in the lines of our immortal bard—

“Thus far our fortune keeps an upward course,
And we are graced with wreathes of victory.”

E. O. T.
The Tulane-Texas Debates

First Annual Debate
Held at New Orleans, La., April 21, 1901.

SUBJECT
Resolved, That the United States should not retain permanent control over the Philippines.

DEBATERS
Tulane. Texas.

Tulane upheld the affirmative and received the decision.

JUDGES

PRESIDING OFFICER
Judge Newton C. Blanchard.

Second Annual Debate
Held at Austin, Texas, April 18, 1902.

SUBJECT
Resolved, That the President, by and with the advice and consent of the Senate, should conclude reciprocity treaties with foreign countries, along lines prescribed by Congress.

DEBATERS
Tulane. Texas.
C. A. Du Champ, Law. J. D. Debrell, Law.
C. D. Tomkies, Grad. E. T. Moore, Law.

ALTERNATES

JUDGES

PRESIDING OFFICER
Joseph D. Sayers.

Tulane upheld the affirmative and lost.

235
Third Annual Debate

Held at New Orleans, La., April 17, 1903.

SUBJECT

Resolved, That the United States should refuse admission to all immigrants between the ages of 15 and 60 years, who can neither read nor write, the wife of a qualified immigrant excepted.

DEBATERS

Tulane.
F. E. Powell, '03.
J. H. Giefoill, Law.

Texas.
W. A. Cocke.
J. A. Debrell, Law.

ALTERNATES

Geo. H. Wright.

J. P. Luton.

JUDGES

Judge Chas. Parlange.
Judge O. O. Provosty.
Geo. H. Terreberry.

Tulane upheld the negative and lost.

Tulane-Texas Debate

First debate of the second series of annual debates between Tulane and the University of Texas, held at Austin, Texas, April 20, 1904.

SUBJECT

Resolved, That the history of trade unions in the United States in the past twenty years shows a tendency detrimental to the general welfare.

DEBATERS

Tulane.
J. L. W. Woodville, '04.
A. Giffen Levy, '05.

Texas.
J. P. Luton.
T. J. Milliken.

ALTERNATES

Sol Weiss, '05.

Mr. True.

Tulane upheld the negative side and secured the unanimous decision of the judges.

JUDGES

Hon. A. P. Woolbridge.
Major Ira H. Evans.
Dr. R. J. Briggs.

Second debate of the second series, held at New Orleans, La., April, 1905.

SUBJECT

Resolved, That independent action is more effective than efforts for reform within previously existing parties as a means of securing good municipal government.

DEBATERS

Tulane.
A. Giffen Levy, '05.
Edw. O. Tabor, '05.
Sol Weiss, '05.

Sophomores organized their team this year mainly to promote college spirit. Both faculty and students were amazed when it was rumored about the grounds that the annual contest of the lower classes was to be played for the benefit of the Campus Fund.

The teams were handled by Kilpatrick and Moise, who managed the affairs in a most creditable manner. Rain was feared, but spirit was there, and in spite of everything, a very good sum was added to the fund.

The team of '07 was far from being the best team in college, but every effort was made to beat the Freshmen, who were the undisputed champions over the Prep. Schools. This effort was felt when the game started. It was by constant practice and the strongest determination that the Sophs. succeeded in defeating the Freshmen by a score of 6 to 0.

Hail the Olive and the Blue!

By Walter Miller

Sing no more the famed Cephissus,
With his olive groves divine;
Sing no more the bright Ilissus,
Where Athena's blue hills shine.
Sing the Olive of our college;
To Tulane all hearts be true,
Olive-wreathed shrine of knowledge.
Hail the Olive and the Blue!

Blue the billows rolling lightly
From the Gulf upon our strand;
Blue the Southland skies, whence brightly
Phœbus greets our sunny land.
Blue the sapphire, fading never;
But there's blue of nobler hue—
Fair Tulane's! With joy we'll ever
Hail the Olive and the Blue!

Gray-green olive, blue-bells swinging
In our garlands intertwine.
Blue and Olive's glories singing
Every heart and voice combine.
'Neath her flag Tulane rejoices,
Marching on to vict'ries new;
In her praise unite her voices:
Hail the Olive and the Blue!
Shovel and Tongs

One warm August morning, Mary Lou Endicott, the grand-daughter of a bishop, was sitting upon the ground in a shady nook beside one of the delightful springs belonging to her grand-father's summer home in North Georgia. Near her sprawled the bishop's private secretary, who had graduated from the University of the South only a few years before, and had not yet acquired that dignified air becoming to one who aspires to the clergy. He was playing a solitary game of "mumble-peg," while Mary Lou watched him with a very lackadasical, bored expression upon her usually vivacious face.

"Please stop playing with that knife," she finally begged; "it makes me nervous to see you interested when I haven't a thing in this world to do. Why don't you try to amuse me? You are not a bit polite today. I am going to tell grandfather to make you work in the morning hereafter."

The young man sat up hastily, straightened his broad shoulders and pushed his hat back from his forehead.

"What would you have me do?" he asked anxiously; "I am sure that I was perfectly willing to let you play mumble-peg with me, but you declined very rudely."

"Who wants to play mumble-peg?" she returned petulantly. "Don't you know of anything more exciting than that? Haven't you something entertaining in your numerous pockets?"

"Nothing but a pack of cards," he answered, drawing them from his pocket, "and I don't suppose that it's proper that I should have those. However, they are trick cards, and I'll do a few 'stunts' for you if you want me to."

"Never!" she said firmly. "Nothing could be more stupid. I wonder why some people like cards anyway? I used to think that I disliked them, because grandmother was brought up a Presbyterian and could not play with them when she was young. But lo and behold! I find that my antipathy was not inherited after all, because now that she is an Episcopalian, she is just foolish about whist and euchre."

"Most card games are decidedly stupid," answered her companion, meditatively.

"Not all of them, though," said Mary Lou, mischievously. "I have heard of one rather exciting game, but I wouldn't dare to breathe the name here. Grandmother's prejudice still holds good in that instance. If anyone were to play a certain game beginning with a "P" on these premises and she were to hear of it, I verily believe that she would have the sinner turned out into the wintry blasts."

"Suppose we play, then," he suggested. "A wintry blast or two wouldn't be so bad this kind of weather."

"Do you know how to play?" she questioned in a tone of affected horror.

275
"You mean poker? I have never heard of a college man who didn't know a little about it. It's really very interesting."

"Oh," she said; "please tell me about it—it's the only game of cards I ever really wanted to play. Do you know," she added, "I believe I'll get you to teach me all about it. Would that be very wicked? It's such a stupid day, and I haven't had a single exciting experience for two long months."

"It wouldn't be so awful, I don't suppose," said the secretary, smiling. "We needn't use any chips."

Mary Lou looked all about them, so as to be sure no one was near, then settled her skirts and collected her wits for learning this delightfully wicked game of poker.

II.

Two or three days later, Mary Lou and the secretary were playing checkers on the porch, when suddenly, after about a dozen games had been played, the former pushed all the men into a pile and said:

"Grandfather is out, so let's play poker again."

"Horrors, no!" answered the secretary. "Suppose your grandmother should come out here."

"Oh, she would never know the difference if she did," replied the girl. "If you don't play with me, I shall tell the bishop that you taught me how," she added, warningly. "Anything to please you, then. Wait a minute, and I'll get my cards."

Soon after, just as the two were absorbingly interested, a sweet voice was heard from a window just back of them.

"What are you playing, dearie? I can't understand it at all; it is so rapid—sometimes you throw down the cards without looking at them scarcely, and then deal over again. And you use such queer expressions."

At the first sound of her grandmother's voice, Mary Lou had jumped about six inches. Now she sat looking at the embarrassed secretary with a scared expression on her face, utterly at a loss what to answer.

"Why, grandmother," she said, with a nervous laugh, "haven't you ever played this? I don't think it is a new game." Then, as a bright thought struck her: "It is called 'Shovel and Tongs.'"

The secretary looked relieved, and Mrs. Endicott repeated the name in a puzzled voice.

"What an odd name for a game of cards. However, it looks interesting. Is it hard to learn?"

She left the window and appeared on the porch a few seconds later. The two poker-players were tolerably composed by this time, and Mary Lou answered: "No'm, not so very hard. This is only the second time I have played." "Then, my dear, do teach it to me. It looks just as nice and exciting as anything I know. It seems to be scientific, too."
The dignified old lady seated herself at the table, shuffled the cards gracefully, gave them to Mary Lou, and asked for her first lesson in "Shovel and Tongs." The young man choked as he heard the name and disappeared suddenly in the direction of the water pitcher. When he returned ten minutes later, calm and collected, he beheld the two nearest relatives of the bishop deeply engrossed in the greatest gambling game of the world. Mrs. Endicott learned rapidly and soon developed a perfect passion for the game. She played whenever she could get a partner, and even taught several of her friends how to play. Much to the amusement of the bishop's grand-daughter and secretary, "Shovel and Tongs" soon became the favorite pastime in a certain little summer resort in North Georgia.

The following autumn Mrs. Endicott went on to Austin to visit the wife of Bishop Gonzales. About a week after her arrival she began to feel a longing for a game of cards. Mrs. Gonzales did not care at all for this diversion, so Mrs. Endicott succeeded in persuading the two sons of the household to play with her. The boys were about fourteen and fifteen years old, and the game which Mrs. Endicott proceeded to teach them was "Shovel and Tongs."

Just as the card party was in full swing the bishop walked into the room in search of a book. Hearing a few familiar (the bishop had been a college man) yet objectionable words, such as "straight," "royal flush," "full house," and a few others, he paused in his search with a look of intense surprise on his face. This was soon mingled with amazement and incredulity, then with interest. He came forward and stood behind Mrs. Endicott's chair.

"What are you playing?" he asked her.

"Isn't it fascinating?" she replied. "Mary Lou and my husband's private secretary taught it to me last summer. I have just begun to teach it to your boys. They seem to learn rapidly."

The bishop's eyes twinkled. "What is it called?" he asked.

"Shovel and tongs. They do give games such foolish names, don't they?"

"They surely do," said the bishop, and began to laugh. Some minutes later Mrs. Endicott came to the conclusion that he was never going to cease. His sun-burned face really looked red, and tears were rolling down his cheeks. Finally he wiped his eyes and took a deep breath.

"What is the matter?" asked Mrs. Endicott, while the two boys seemed very much astonished at their father's behavior. "Have you ever played it before? You seem to be enjoying rather pleasant reminiscences."

"Well, I don't reckon that it would be exactly right for me to say I have ever played it. Still, I did see the other fellows at college play once or twice."

The corners of his mouth twitched and Mrs. Endicott had great fears of another siege of laughter, so she said quickly: "Well, what about it?"

"Nothing," said the bishop, "except that it was not then called 'shovel and tongs.' It masqueraded under the name of another fireside implement."

"What was that?"
"See if you can guess, Mrs. Endicott."

"Let me see. Grate, fender, shovel and tongs, poker—poker!" she cried out, in horror.

The bishop was too weak to say much, so he merely nodded assent. "That very same," he chuckled, going off to the verge of hysterics.

"I don't believe it," said Mrs. Endicott, indignantly. "Poker? Why, Mary Lou—and the secretary. She's going to marry that young man next March. Surely, my granddaughter—poker!" Her voice subsided to a whisper.

Bishop Gonzales takes a great deal of pleasure in telling how he once walked into the same library in which he usually writes his sermons, and beheld the wife of Bishop Endicott teaching his children how to play poker, under the euphonious name of "Shovel and Tongs."

It's a game
Folk will play,
'Til the very end of time;
But its name
I'll delay,
'Til the last line of this rhyme.
Now it's win,
Now it's lose,
Now it's tire and give way;
Once you're in,
You can't choose,
But to take your chance each day.
Now it's smiles,
Now it's tears,
Now it's struggle, toil and strife;
And its wiles,
Fools and seers,
All have felt; for this is—Life.

English
A funny language, I declare,
In little words and big;
The man who gets a "lion's" share,
We're apt to call a pig.
The Youth Awakes from a Day Dream

HERE was once a Youth. Having an idea that there was a Main Chance waiting for him at College, and Knowing that nowhere else could he be a true Sport and attract more attention, this youth directed his foot towards Tulane.

There was one Possibility that had never played Hide-and-seek in his weak mind. Where he came from, he was a Senior, and whenever he came around the small boys gave him their Marbles. Sometimes the professors spoke to him, but they were Chastised if they did not raise their hats when they did so. That he possessed less Knowledge than other People had not occurred to him. Tulane was but a gambling ground for Lambs, not an institution of learning.

On the Opening day he strolled into Gibson Hall, with a Large Pad on each shoulder, a pair of Peg-top Trousers, and an air of Here-I-Come on the Middle of his face. Besides these attributes he wore a dicer and a Medium-Sized Grin. Strange to say, the president did not offer him a Job as assistant, neither did the second-year sports regard him with due respect. Instead, before he knew it, his dicer resembled an Imitation of a relief map of the Rocky Mountains, and he was doing Delsarte and Oratory for Universal amusement. His face put the Grin out, and Substituted somewhat the appearance of a Cross-Section of a Ham Sandwich. In a word, his confidence had Departed, for he had found Individuals whom the Tale of his superiority had not reached. When the Trained Nurse had left the house of the youth, and he ate a general diet instead of Pepton and Sterilized Milk, he came Back. His mother told him not to associate with Rough Boys. And first he went Down Town and invested in a small soft hat and a thin voice, besides a Pony and three Cubebs. Moral! There is no moral.
Well—Have You Got The MONEY?
Pass Words to Clinics

Gentlemen, allow me to interpolate here that I am professor of physiology, hygiene and pathological anatomy.—Chaillé.
These are the essentials, gentlemen, you either know it or you don't know it.—Souchon.
Stomach tube.—Halsey.
Non-attendance.—H. S. Lewis.
Remember your anatomy, gentlemen, and don't forget this, please.—J. B. Elliott, Jr.
Incise freely and drain.—Matus.
Don't forget your 'istory, gentlemen.—Butterworth.
Differential diagnosis.—Dyer.
Humor the babies.—Fenner.
On the War-path.—Sexton.
Never kill your patients with medicine.—J. B. Elliot, Sr.
Paquelin cautery.—Hume.
Plenty of fresh air and sunshine.—E. S. Lewis.
Well, boys, we won't have punch Founders' day.—Metz.

Inseparables

Tom Lanaux and the race track.
Johnson and his opera glasses.

Metz's platinum and the Freshman.
Pothier and his rabbits.
Cross and his tambourine voice.
Smith and his dogs.
Sexton and his pocket bistuary.
Cazayoux and the Charity Hospital.
Henriques and the staff seats.
Life in the Dormitory
Boys Will Be Boys

T ONE of our most fashionable clubs there was assembled a group of young men of the age of twenty-four, or thereabout, all seemingly congenial, and all lounging about in decidedly free and comfortable positions. Ash trays, bottles and glasses were conspicuous, and with many an interval for a puff and a toast, each one present was taking his turn at entertaining the others. Whether it was cigar or wine which recalled these reminiscences I leave it to you to imagine, for that's not my part of the story.

Most of us had had our turn already, so it was now Dick's time to amuse the crowd, and knowing that the twinkle in his eye meant something funny, everyone unconsciously settled himself more comfortably as if to enjoy this story to the utmost.

"Well, if it's up to me," said Dick, "I suppose I'll have to stand the pressure, besides it was so absurdly funny that it would be a shame to let you fellows miss a laugh. It all happened when I was a Junior out at the university, and every detail of the incident stands out as clearly as if it happened yesterday. My room-mate, whom for convenience we will call Harry, was, at that time, firmly convinced that the world, in general, and college men, in particular, were badly in need of salvation; so to the great delight of both his parents, he had decided upon the ministry as his profession. Now I'll give Harry credit for this much, if we didn't agree with him, we did, at least appreciate his sincerity, and respected his principles as well as the manner in which he lived up to them, and what is more, we certainly showed our interest by affording him a good large field for practice.

"As perhaps you may have suspected, the rest of us weren't trying to convert ourselves into human air-ships by growing a pair of wings, so an occasional lark, the exact nature of which need not be divulged, was not entirely barred from our weekly schedule. In fact, we rather felt it our duty to go out after dark just to see if, without the aid of the sun, we could read the signs in front of various well-known places; or if the night were too dark for that, to take them down and prove our remarkable power of visualizing by painting on them, with the class colors, some well remembered words which we had seen or heard. Then, after this was accomplished and we had gone inside the buildings to which we had been attracted by the signs, and had drunk the health of those present, of the professors, of absent friends, in short, of everybody and everything that happened to be mentioned, we turned our steps once more towards the dormitory, there to find comfort for our tired bodies in slumber which often lasted beyond the first recitation period next morning.

"It was after just such a celebration that the crowd of us were preparing for bed, when a brilliant thought struck one of the fellows, who immediately passed it around for criticism and approval. Well, it sounded sufficiently exciting and unusual, and there was nothing left to do but to act on his suggestion. Harry, after an edifying evening spent in studying the heavens for data for his astronomy class, had, of course, been for many hours
safe in the arms of Morpheus; and he really looked so unsuspecting as he lay there, and seemed such an easy victim that our conscience (I use the term purposely in the singular because I really believe we had only one among us) began to hurt. However, the chance was too good to be lost, so we didn’t waste much time in sentimental scruples and, in scarcely more time than it takes to tell it, cotton was suspended from the windows and doors, and stuffed into bowls, pitchers and tubes, and, with suppressed explosions of laughter on the part of us boys, and much wiggling on the part of six harmless garter-snakes, long strings of coarse thread were attached to all of them. Everything was in readiness; dead silence fell upon the group; a signal was given and simultaneously with the igniting of the cotton, the snakes were thrown into poor Harry’s bed. As their cold, slimy bodies touched his warm skin and squirmed about his hands and feet, an expression first of discomfort, then of fear, and finally of horror spread over his face. With a start of terror he opened his eyes, took in the whole situation, and then in tones of most intense dismay, he shrieked: ‘Fire! Snakes! Snakes! Fire!’ and was out of bed so quickly it made one dizzy to watch him. But at his very first cry for help, the flames were extinguished, and the snakes quickly withdrawn by means of the strings, invisible in the dark, and after they had been hastily precipitated into the yard below, we rushed excitedly upon the scene to inquire what on earth was the matter. Poor Harry, half distracted with fright and the suddenness of the thing, tried to explain and tell us all about it, while we, unable to find either fire or snakes, began to argue with the terrified boy that the whole affair had simply existed in his own brain. We then began to tease and joke, and to insist that he tell us where and how he got that “beautiful drunk,” promising upon our word of honor as gentlemen never to let the matter leak out, and heartily congratulating him upon the splendid manner in which he had become one of us.

“Of course, Harry expostulated and entreated, vowed and declared, and finally was driven to swear that he hadn’t been anywhere, seen anybody, or touched a drop of anything that night or any other night. But his denials merely making matters worse, we decided that an ice cold shower was the one thing necessary to relieve Harry’s feverish condition and to clear his hazy memory.

“So a bath had Harry, and a laugh had we, and — what did you ask? Did we tell him the truth? I should think not. Don’t you ever remember of hearing the saying, ‘Where ignorance is bliss, etc?’ Well then, what’s the good of learning proverbs or anything else, I’d like to know, if you can’t put your knowledge to some practical use when the opportunity presents itself?”

Why we all came to college?
To beat the Junior's!—38–28 ?!!!
And Seniors !!!
"Ven I Vas in Vera-Cruz"
Our Book Department

How They Were Parted. By Al Lefevre. A discussion on tonsorial art, illustrated by photographs of the author.

Hints to College Presidents. By R. K. Bluff. 5 vols. $10 net.

Never Too Late. An interesting treatise on matrimonial matters. By W. H. P. C. Bound in macaroni, $1.50; in paper, 50c.

How to be Happy Though Good. An able book on the gas engine and centrifugal pump, by an expert.

How to Lose an Election. By the late ward boss, A.A. Molino. The experience of the author qualifies him to write on this topic. Illustrated by photos of the author at various stages of the campaign.

Of What Use Are Freshmen? By M. N. B. Deep investigation and long experience have qualified the authoress for expressing authoritative views and asking pertinent questions. For gratuitous distribution.

Things I Have Seen. By an academic bored president. A companion book to "Reminiscences of Genius;" formerly published as "Wild Animals I Have Met."

(With apologies to Milton's Lycidas)

Weep for her, woeful brethren, weep for her, For Carrie, your sorrow is full sore; Forced as you are through society's door, So sports the maiden in the high-heeled shoes. And yet anon holds up her coiffeured head, And tricks the men; and with new-gathered might, Shiver with her brilliance in the ball-room's light, So Carrie has sunk low, but captured males, Through the fine art of her who trims the nails.

("Lines to a Senior upon having her hands manicured for her first formal dance.")
REMOVING THE GREENNESS
HEN a Freshman comes to Tulane,
Funny feelings wrap his heart;
On his weak mind is a great strain,
Every Sophomore makes him start.
Measely, puny and despised then,
By the Sophomore, Junior too,
On the campus he is beaten,
Forced to shine some Senior's shoe.
Past this stage, the Sophomore's risen,
Thinks he's lord o'er Freshmen now;
And he goes about a "quizin,"
With the Freshies for a row.
But his pride drops in a hurry,
For the Juniors do him bluff;
And he's muchly in a flurry,
Seeing he's not red hot stuff.
Next the Juniors' think that they
Are quite the thing by now,
Forgetting how many a day
They were threshed in many a row
(Made in some cold pond to lay).
But the Senior at a college,
Rules supreme quite everywhere;
He ranks first in sport or knowledge,
Nowhere does he lose his share.
Faculty looks up to Senior,
Freshmen think him some renown;
Sage or wiseman, or a leader,
When he dons that cap and gown.
All salute to Senior knowledge.
Doff your hats to him at once;
Highest product of a college—
Even tho' he be a dunce.

—Edw. O. Tabor, '05.

A Thanks Offering

I thank thee, mother, for the box you sent,
The fruit, the cakes, the pies and salad, too;
The candy tied in box with ribbon blue,
Just as an angel on a mission bent.
I do not mean this, mother, for a hint,
But mean to give to you just what is due;
For thanks to you, I send with meaning true,
I know the feeling with which it was sent.
But now 'tis gone, yet something still remains,
It left behind the traces of a pain;
And every night I, in my visiors see,
That box which you, oh mother, sent to me.
But all these little pains were not in vain,
So please remember, send that box again.
—Minnie Boyd.
TAKING HIS DAILY WALK
An Addition to History

HE ancient and geometrical joke told on Gregory, who afterwards became pope in spite of his punning capacities, is entirely false and absurdly groundless. After a long and scientific search among the weeds in the various fields of learning, the following document was discovered, which may throw some light on the origin of the story: "And lo, scarcely had the third chime sounded from the point three, four, when the slave owner issued with his wares from an exactly definite position on the Y-axis. He stationed himself on an asymptote, and mailed a solitary letter, for he was in one to one correspondence with a young lady. This done, he anxiously awaited customers, with his knees crossed like a pair of co-ordinate axes. He was not kept long in expectation. A strange figure, actuated by the springs of reasoning, not reckoning, moved along towards him. This figure was perfectly real, tho' it had not been, it would not interfere in the least with our concept of it. When it reached the slave owner, it became gradually perceptible that it was Dr. William Benjamin Smith, no other. He saluted the trafficker in human blood with an ellipsoidal movement of his head.

"What have you there?" he demanded, sternly.

"Angles," answered the man; "Angles, just imported from—" He stopped, amazed
by the change produced in Dr. Smith's countenance by the words he had spoken.

"I wish to purchase them immediately," shrieked Dr. Smith, producing from his
pocket a rho, a phi, and a delta. "Name your price."

But the dealer in slaves was Wyl. He prepared a diplomatic speech, and delivered
it somewhat after the following manner. "Although these slaves seem to be precisely
similar, they vary all the way from minus infinity to plus infinity. Therefore, if I were to
sell them to you I would have to demand a price in harmonic proportion with their values."

"I deny that they are not precisely similar, and therefore deny that you are just in
charging different prices for them."

"How so?" asked the slave owner.

"They are faultless, are they not?" asked Dr. Smith.

"Yes."

"Therefore they are all right."

"Yes," repeated the slave owner, not suspecting his proximity to a pitfall.

"O. E. D.," said Dr. Smith, triumphantly; "They are all right angles, and do you
dare deny, in defiance of elementary geometry, that all right angles are similar?

The slave owner was crushed and humiliated. He ——"

The writer of the manuscript must have either wept a bitter tear or used a fountain
pen at this point, for the rest of the document is entirely illegible. However, we may
reasonably suppose that Dr. Smith purchased the angles according to his own idea, and
that they are those which are now installed in his class-room at Tulane University to
the eternal annoyance of himself and others.
AT THE MEDICAL DEPARTMENT
College Occurrences

Demonstrator of Anatomy (picking up muscles of forearm).—What is this? Student.—Flexor Carpi Digitalis.

Prof. Chaille.—What great pest has been brought from Italy to America? Student.—Italians.

(Skin Clinic)

Demonstrator.—What are the appendages of the skin? Student.—Legs, arms, ears, nose and others.

(Operating Room)

(Senior to classmate).—What operation did Prof. Matas perform on Wilson? (Ans.)—He removed his appendicitis.

Why do medical men think Cohn belongs to the vegetable kingdom? Because he is composed of Carbon, Oxygen, Hydrogen and Nitrogen.

(Committee to a Freshman.)—Give me twenty-five cents for Jambalaya. Freshman.—I never eat Jambalaya.

Dr. Souchon.—What is the longest bone in the body?
First Course Man.—The backbone.

(One second course man to another.)—First: What did Prof. Souchon say of importance in his lecture on anatomy? Second: I was asleep, too.

Souchon.—What is the "pecularity" of the nose?
Freshman.—It is between the eyes and projects outwards.

Prof. Metz (to a Sophomore.)—Why do you sit so far away during my lectures? Sophomore.—Doctor, I don’t want to catch those big rocks that you distribute for inspection.

Belfield persists in telling the students that he is not a doctor, showing that he knows a good thing when he has it.—Secretary.

Prof. Metz, in a lecture on the chemical elements, told the students that all the elements are named for the various countries in which they were first found—for example, germanium, for Germany, etc.

Student (Jarrell.)—Professor, after what country is Helium named?
Medical College Questions

Why do some people consider Dr. Dyer an undesirable teacher?
Because he tries to teach his students a skin game.
Why is it said that Dr. Batchelor is liable to give us an unfair deal if he should examine us?
Because he has shown himself to be an expert grajter.
The Class of ’06 should excell in hygiene,
For in its roster a Bath is seen.
For reasons of temper don’t be at a loss,
Because in our class list you see A. B. Cross.
Why do they move at such a nice pace?
Because if you look good you’ll find they have Grace.
If they get as boisterous as a child,
Go ask Dr. Chaillé how they got Willy Wild.
If the class would lead they should not flinch,
For with the possession of Pipes they have a lead pipe cinch.
Our class shows the result of having been through the mill,
For they possess Marks, and no other class will.

At the Senior Study Warming

Rules and Maxims.

1. All drinks are good drinks.
2. No jags allowed except under special permission.
3. Everyone gets an even start.
4. No recall system.
5. Once boozed, stay boozed.
6. No outsider need know the physical condition of the gang.
7. No professors, dead-heads, or W. C. T. U.’s allowed.
8. Select your special post early in the evening.
9. This is no helping hand mission.
10. Remember you can’t get boozed on ice water.
11. Every one for himself. God for us all.
12. No special cars.—By Order of the Committee.

299
A Senior's Toast

Whene'er I drink the sparkling wine,
   Effervescent, bright,
My cares all vanish like the dark
   Before the morning light.

Why should I whine and peck and pine?
   Why should I fret and fear?
Since die I must and turn to dust,
   I'll seek my pleasure here.

Let us drink then the draught,
Which by Bacchus was quaff'd;
   Let us drive care and sorrow away;
For at each emptied bowl,
Away troubles roll,
Like mists in the sun's early ray.
"I want to see Maude Adams," announced the Littlest One in oil class one morning.

"So do I," echoed the Littler, Little and Big One.

"But we haven't the money," wailed the Littlest One, sadly. Then a bright thought struck her, "Let's redeem our locker keys and get our fifty cents and go to the pit."

"Let's," "All right," and "Bully," were heard from the three others.

So it was that four Seniors trailed into the office and laid down four locker keys, receiving in exchange the coveted fifty cents. Four radiant Seniors they were, as they "cut class" and sat in the sun. Then blank despair was cast over them by the practical Littlest One saying:

"How will we go? Some of us can not go on Saturday to the matinee, and we have nobody to go with at night."

"Ask John to take us."

"Not if he were the last man on earth."

"Why don't you ask Willy?" asked the Lazy One, as she strolled past.

"The very thing," exclaimed the again radiant Four. "The Little One will have to ask him, as she is his niece."

But the Little One had slipped off home for lunch. So the other three decided to waylay her when she came back and make her ask "Willy."

At lunch time the Littlest met "Willy" in the hall. "There is a committee waiting for you downstairs, professor," she said.

"Do they want money?" he asked, with one hand on the window ready to jump out if they did. On being assured they did not, he went down stairs the usual way. "Here he was met by the Little One.

"Please stay here, professor, the Little One wants to ask you something," she said. So he sat down and the Littlest One did not run away, while the Littler One, the Big One and the Lazy One watched for the Little One.

"There she is, run Little One, and catch her before she goes to the pottery," said the Lazy One. So the Little One was made acquainted with the plans and hailed them as an inspiration. She told "Willy," and coming back, told the others that he wanted to see them. They refused to move, so she pulled the Littler One, who pulled the Littlest One, who in turn pulled the Big One.

"Now, what is your plan? Just to butt right into the pit?" They agreed that was their plan.

"Then I'm your man," he said.

That night the conductor looked somewhat surprised when our elegant crowd alighted in front of the Tulane at seven o'clock. The pit crowd had not begun to collect, so "Willy" was able to procure a most advantageous place whence to "butt in," as he expressed it. As the crowd collected he began to discourse with lavish gestures and a total forgetfulness of the opened-eared and highly interested audience around him.

A most striking series of cartoons for JAMBALAYA. First deep despair—no money. Ho, an idea, his fore-finger went to his forehead and brilliancy and inspiration lit up his features; "Then the rush on the secretary with locker keys. Blank despair again." (Here I want to give the professor a hint, that deep despair is not as becoming to him as a bright idea.) "No escort, ho, another idea! Next I am seen in a corner surrounded by girls of all sizes. Now, I am sure something will happen before we get home, one of us will get killed on the stairs or some other small thing."

Suddenly, after they were all safely seated in the pit, and were trying to keep "Willy" in order, the Littlest One burst into an uncontrollable fit of laughter.

"What is it?" "What's the matter?" "Tell us about it."

"The girl behind me said to the man with her, 'Wait a minute, till I put my gun away,' and then stuck it right behind me," explained the Littler One at last. "I tried not to laugh but could not keep from it."

In the touching scene where Babbie steals away from the Manse garden in grief, the Littler One began to feel wildly in the laps of every one near her.

"Here, take this," said the sympathetic Big One, handing her a man's large handkerchief, that she had kept in reserve for her own tears.

"I'm not crying, I don't want a handkerchief, I want the opera glasses," whispered the Littlest One, loudly and indignantly.

As they emerged from the pit entrance "Willy" said: "Let's do it again."

"O, yes, we must," said the Big, Little, Littler and Littlest One with one voice.

Money as a Fool Developer

AST night as “Weary” and I sat chatting over our grog and cigars, I cast a retrospective glance over my shoulder and immediately began to comment on the utility of the expression: “What fools these mortals be.”

As I leaned leisurely back in my chair and watched the rings of smoke curling towards the ceiling, I began to recall the different means by which people constantly endeavor to display to the greatest possible advantage just what they are not.

A particularly pathetic case was that of May Simple, yes, just simple May was what they called her on week-days. She came of the proverbially poor, but honest folk. Her father kept a small set of books in a dingy little office, while our heroine stood guard at a ribbon counter in one of the great down-town stores. May wasn’t beautiful, in fact she was not even pretty. Her hair was a disappointed sorrel, while her face had a hand-made look; but the boys declared she was prime, so now and then a caller came to lay a bunch of blue forget-me-nots on her shrine and to assure her that he had long worshipped in silence but that he had at last been goaded to desperation by the shafts from the lover-god’s bow, and that he could no longer repress his holy passion. Her “steady” was one of those well known gentlemen who mount a tripod at the street corner and separate the gullible from their hard earned plunks. May frequently passed him when he was handing out something like this: “Gentlemen, I take pleasure in presenting to you this morning a matter to which I trust you will give your absolute and undivided attention. I have here an article, an every-day necessity; a nail file. Now, gentlemen, let me assure you right here that I am not selling these valuable files, I am not asking for one cent of your money; I don’t want it. I am simply advertising for a house that pays me a handsome salary to distribute these articles.

“I am going to place this file in this envelope and will also drop in a beautiful pair of sleeve links and a genuine Hot Springs crystal. Remember, I am going to pass out only a very limited number of these samples, but before I begin the distribution, I wish to call your attention to another article, a royal leather-bound pocket memorandum book, something that no gentleman can afford to be without in these strenuous days. Now, this book is worth a dollar of any man’s money, but I am not going to ask you that; I am not going to ask fifty cents, but, gentlemen, I am going to sell a few of these valuable books for the insignificant sum of twenty-five cents, and to every man who gives me this amount, I am going to give an envelope of valuable presents. Remember, you are getting these valuable articles absolutely free, and without price.”

It was May’s delight to hear her “Romeo” wax eloquent as he drew the suckers into his net.
Small was booked for a visit on Sunday night, and May was impatiently watching the flight of time. The days had passed slowly indeed, but at last Friday came and the week promised to pass off without mishap, when on Saturday night papa Simple came home in a fit of the wildest excitement. He had just been informed through some attorneys that he had come into possession of a million left by a gouty old relative who had shuffled off in England. Mamma Simple went into “hysteriks,” while May and papa became too full for utterance. But Mrs. Simple, whom her neighbors considered a very plain and unassuming little woman, suddenly regained her composure and straightened up with hauteur that would have made a princess green with envy. It began to dawn on her hitherto benighted intelligence that they were no ordinary people, that nature had fashioned them to be a power in the great social machinery and that the world would suffer an irretrievable loss unless they responded to the call. Before the week was over, Mrs. Simple had decided that their name was entirely too plain, too common for people of such significance and that the press should say, “At the elegant home of Mr. and Mrs. Vanderhousen there will be given thus and so by the charming and accomplished daughter, Miss Xymia, etc., etc.” With one accord they declared that familiarity is vulgar, and that every one who should attempt such gross informalities should be met with a frown that would make Medusa take to the tall grass in terror. Lytel Small, who had been the hero about whom there had clustered so many of May’s romantic pictures, suddenly became an old edition and was received in a manner as cold as the charities of this world. She even dared to hint that he should become conspicuous by his absence. Small’s heart was broken into smitherines, but he bound up the pieces and took himself off to some remote parts and there by meditation most profound endeavored to survive the shock.

A great debut was planned, and in due course of time, a bunch of fashionably cut rags and a mite of a woman were thrown into the social vortex, while mamma “Vanderhousen” sat by and looked on with as much delight and satisfaction as an old maid would experience upon discovering a man under her bed. Papa grew restless; he drifted into Wall Street and made a dump, of course he was a wise one and could make a killing, but Dame Fortune was fickle and he lost more. He finally came to the conclusion that he was in the right church but the wrong pew, so he played the ponies and the ponies played ping pong with his green. In despair he had to admit that when it came to matters sporting, he was a few chips shy.

Vanderhousen grew discontented and began to hint that all was not gold that glittered, while simple little May sighed for the little home with its bare floors and cromo pictures, but mamma was stubborn and quickly put a quietus on such plebian expressions and continued to plan more of those functions at which the chief endeavor is to be equally as foolish and as artificial as those better able to play the fool.

MORAL.—We may know a man for half a century and consider him sensible, plain and unassuming, but “good fortune” will speedily determine his depth of mind and spot-light like will reveal his true nature.
Notes from the Art School

ECHOES FROM THE OIL PAINTING CLASS

"The debatable land."
"Please, young ladies, don’t eat the models."
"Young ladies, this is not an afternoon tea, but, oil class."
"When in doubt, use the pallette knife. But—not on me."
First Senior.—"Where did Flossie get that chin?"
Second Senior.—"Why, Mr. Woodward made it to order."

NOTES FROM COMPOSITION CLASS

"Don’t make sissified drawings."
"Those are such poverty-stricken trees. Please enrich them."
"Nothing could be more difficult than to paint a head in oil; except, of course, to paint two heads."
"If that is snow, then I wish it was not. If it is sand, it is a mighty sandy place."
"Now, as to that road. I will draw you one right."

NOTICE

Notice is hereby given to the public that three additions have been made to the Senior Art Class.—“Uncle L.,” “Uncle Fred,” Uncel Will.”

At a recent meeting of the art student body, it was decided to award a diploma to “Uncle L.,” this May. He is very young, but on account of his hard labor, the body decided to award him one with the “twelve stars.”

Marian Beane.—“This fellow is wise enough to play the fool,
And to do that well, craves a kind of wit.”
Minerva Dickinson.—“A daughter of the gods,
Divinely tall, and most divinely fair.”
Mathilda Gray.—“Shrine of the Mighty, can it be
That this is all that remains of me?”
Marian Irvine.—“I am nothing if not critical.”
Bessie Lansing.—“With the smile that was child-like and bland.”
Annabel McQuiston.—“The glass of fashion,
The mold of form,
The observed of all observers.”
May Morel.—“Her voice was ever gentle, soft and low;
An excellent thing in woman.”
Vera Morel.—“I loathe that low vice—curiosity.”
Lynn Watkins.—“Some unite in glorious Milton.”
Fan Warren.—“Some are born great,
Some achieve greatness,
And some have greatness thrust upon them.”
Ella N. Woods.—“Her golden locks were hanging down her back.”
Alma Woodward.—“She held her head up high and cared for no man—she.”
And now that we’re about to close,
We wish to say farewell;
You may be sure that we are sure
That we all wish you well.

WHEN BENJAMIN FRANKLIN AND HIS KITE brought electricity from the clouds he little dreamed that in the 20th century the electric current would have become a commercial necessity.

Yet to-day, to properly illuminate your store, you must use the electric arc and incandescent bulb, and your factory is antiquated if it is not fitted with modern direct connected electric motors.

You literally burn your way into the mind of the public by using a sign of glowing lamps at night and keep yourselves and others cool in summer by means of electric fans. Phone our expert, 175; he'll call around and tell you how cheaply all this can be done.

Located in the Second Healthiest Place in the United States
Covington, La.

OFFERS unexcelled advantages in its thorough courses of study in Science, Mathematics, History, Ancient and Modern Languages, and Military Drill. Scholarships are offered the Academy by Tulane University, New Orleans, La., and Washington & Lee University, Lexington, Va. The Dormitory is of brick, furnace-heated, gas-lighted, with stationery washstands in all the rooms. The baths are always supplied with hot and cold water. Two boys occupy a room; each boy is provided with a separate bed; and everything is done to promote their comfort and physical well-being while giving them a thorough preparatory education. The Academy grounds comprise about thirty acres, including baseball, football and basket-ball field; tennis courts, golf-links, and a large gymnasium with swimming pool attached.

The number of pupils is limited and each one is thus enabled to receive greater individual attention. Write for catalog, or further information to

Pictures and
Their Frames

Deserve all the consideration that in
many cases is given them, and in most
cases more.

A stock must be large and varied in
order that the innumerable styles of pic-
tures we have now a-days be appropriately
framed. Our stock is large and varied, and
most carefully selected, and orders are
executed by craftsmen of large experience.

Though a step lower in price you will
find us a step higher in quality and style.
