SPECIAL THANKS

To Bill Hopkins of Josten's Publishing Co. for his expertise and patient counsel.
To our generous sponsors and to the parents, companies and organizations who advertised in this publication.
To Victoria Burten for spending long hours helping us type the copy for this book.

To Mike Puyau and Colleen Storrs for helping us get organized when we didn't know which direction we were heading.
To Cindy for helping us obtain information and historic photos for the History of Tulane Section.
To Parents who contributed pictures for the Childhood Photo section.

University Of Louisiana, Medical And Law Departments

Tulane University School Of Medicine 1984
THE HISTORY OF TULANE MEDICAL SCHOOL

Tulane Medical School had its auspicious beginning as the Medical College of Louisiana in September 1834. Three brash young medical men, all less than 26 years of age, initiated the beginning of medical education in Louisiana. They were Thomas Hunt, who was to become the first dean of the medical school, Warren Stone and John Harrison. In addition to these three founders, the faculty of the school consisted of four other local physicians: Augustus Cenas, Charles Luzenberg, T. R. Ingalls and E. B. Smith.

Establishment of the school was met with considerable opposition from the Creoles, whose ideas concerning medical education were based on the European system which stressed academics well grounded in the Latin and Greek classics. The idea of providing medical education without this foundation was utterly incomprehensible. Furthermore, the Creoles regarded all American universities with disdain and considered them hardly on a par with the European universities.

When the medical school first opened its doors in January 1835, it became the first medical school in the Deep South and the fifteenth oldest in the country. The Inaugural address was given by Dean Hunt in the First Presbyterian Church. In addition to this church, various other borrowed quarters were used for lectures. A lecture room in the State House and wards in Charity Hospital also served as classrooms. These temporary facilities were the only ones available for use during the next several years, while the faculty attempted to secure the necessary funds for construction of a permanent structure to house the fledgling school.

In 1836, the governor of the state attempted to help the medical faculty obtain funding for the erection of a school building. A measure appropriating $60,000 for this purpose was proposed and passed by the senate, but was defeated in the house. It was not until 1843 that any definitive action was taken. On March 22 of that year, a law was passed permitting the medical faculty to erect a building on a lot belonging to the state, on Common Street between Baronne and Dryades Streets. There were two conditions attached to the law: first, the faculty should donate their services to Charity Hospital without pay for ten years and second, that one student from each parish would be admitted annually to the medical school for the next ten years. The senator and representatives from each parish were to name each candidate. The state also reserved the right to reclaim all properties at the end of the ten year period.
The fact that this bill gave the faculty of the new school professional privileges at Charity Hospital created an uproar among the town's medical practitioners. The opposition was based on the belief that the medical school would be given a monopoly over medicine and surgery at Charity. When it was made clear that this was not to be the case, the medical community joined together, resulting not only in the best medical care the city had ever seen, but also providing the school with a clinical teaching hospital that was gradually evolving into one of the top such facilities in the country.

Charity Hospital is credited with being the first institution of its kind in the country, having been established in January 1736, almost 100 years prior to the founding of the Medical College of Louisiana. The hospital initially opened with a total of five beds and served not only as a hospital, but also as an asylum for the indigent of the city. The original hospital was located on a site in what is now known as the French Quarter and has since occupied four other buildings, including the present facility which was opened in 1939. Throughout the early 1800's the hospital expanded, until, by the mid 1850's, Charity was one of the largest hospitals in the world. It had the capability of housing 1,000 patients, although some patients were sleeping on pallets on the floor or sleeping two to a bed. Interestingly enough, it was said that "there might be two patients to a bed, but they each had the opportunity to take a hot bath." At the present time, the number of beds is given as 1,640. However, the lack of nursing personnel has forced the closure of several wards, resulting in an actual number somewhat below this figure.

Meanwhile, having obtained legislative approval for professional privileges at Charity Hospital, the faculty immediately set about drawing up the plans for a building to house the medical school. This building was estimated to cost $6,000 and was not completed until the end of 1843. In 1845, a Constitutional Convention specified that the Medical College of Louisiana was to become the Medical Department of The University of Louisiana. Two years later, additional funds were appropriated to erect buildings for the new university. The original building was returned to the state to be used by the newly established law department. A much larger building was erected adjacent to the original medical building for use by the medical department.

At the time of its founding, the number of medical students consisted of a grand total of 11. From 1834 to 1859, the number of students grew from 11 to 276. Just prior to the Civil War in 1861, the number of students increased dramatically to 404 because of political and sectional hostility which induced Southern students to abandon Northern Colleges. When the war broke out, most students joined the war effort in such numbers that, by 1862, only 94 students were enrolled. Federal occupation of New Orleans forced the closure of the medical school later that year.
In the fall of 1865, the school reopened its doors with 185 students enrolling. However, because of the devastation wrought by the Civil War and the subsequent Reconstruction, the medical school faced its most trying times. The school struggled financially for its very existence until 1884, when wealthy New Orleans merchant Paul Tulane bequeathed $1,250,000 for the establishment of a university. The state legislature then placed all departments of the University of Louisiana under the newly renamed Tulane University of Louisiana. This donation enabled Tulane to once again assume front rank among American medical schools.

By the early 1890's, rapid growth of the medical school had established the need for new facilities. In 1893, a new building, the Richardson Memorial Building, was built on Canal Street to house the medical school. Although this building was heralded as one of the best equipped medical buildings of its day, by 1907, further expansion was needed. At this time Alexander Hutchinson bequeathed a large sum in memory of his wife Josephine. This fund was used to construct a new Richardson Building on what was to become the Uptown Campus. This building would now house all preclinical departments. Facilities of the old Richardson Building were enlarged for clinical teaching purposes and the building was renamed the Josephine Hutchinson Memorial.

Meanwhile, the school was continuously attempting to raise its standards. When the medical school was initially founded, the school year had lasted only four months, and only two full courses of lectures were required for graduation. Since only one set of courses existed, the students were expected to take the same lectures twice. Admission to lectures was gained with a “ticket” purchased at a price of $20. This was the sole means by which the professors were paid. Additional fees included a matriculation of $5, and a diploma fee of $30. Incidental expenses included the purchase of two arms for dissection at 25 cents each, and two legs at 15 cents each. At this time, the only requirement for admission was the ability to finance one’s education.
Charity Hospital 1939 - Present

Gradually, the annual sessions were lengthened from the original four months to first, four and one-half months in 1879, then to six months in 1893. In later years, the length of these sessions was further extended until it evolved into what it is today. It was also in 1893 that an educational qualification for admission was first required of all students. The minimum qualification for admission was a second grade teacher's certificate of a superintendent of education. Also, to further strengthen educational standards, attendance of three instead of two annual sessions was required. In 1899, this was lengthened to four obligatory sessions.

By the early 1900's, it became apparent that a high degree of disparity existed between different medical schools. In 1908, Abraham Flexner was selected by the Carnegie Foundation to undertake an analysis of the state of medical education. He made a study of 155 American and Canadian Medical Schools, beginning at Tulane in the Winter of 1908. Flexner published his report in 1910, describing shocking and deplorable conditions in many medical schools. This opened the eyes of the public and the medical community such that the Flexner Report was, in effect, an obituary for a great many medical colleges. Within a few years, almost half of the colleges had disappeared, mostly due to the adverse publicity.

Although Flexner found medical education at Tulane far from ideal, he ranked Tulane among the top three medical schools of the South. Tulane's high ranking was based on new and excellent laboratory facilities, the teaching faculty, the clinical availability of Charity Hospital, and the post graduate instruction provided by the New Orleans Polyclinic.
In 1913, Tulane reorganized the medical department to include the school of pharmacy, the school of dentistry, the school of medicine and the graduate school of medicine. Today, only the latter two schools remain as part of the present school of medicine. In 1958, the division of hygiene and tropical medicine was established, which has since evolved into the school of public health and tropical medicine.

The Josephine Hutchinson Memorial Building on Canal Street continued to house the clinical facilities of the medical school for nearly forty years. However, by the late 1920's, the building had become crowded and obsolete. Funds were provided for a new medical unit to be built contiguous to Charity Hospital in what is now the present location of the medical school. When the building opened in December 1930, it was acclaimed as the best medical teaching unit in the South.

The preclinical departments, unfortunately, were still located on the Uptown Campus. Nonetheless, it was acknowledged that to provide the most enriching medical environment possible, all four years of medical education needed to be consolidated on one campus. It was not, however, until October of 1955 that a ten story addition to the Hutchinson Memorial Building enabled the second year departments to be moved downtown. This left only the first year departments on the Uptown Campus. In 1963, further additions to the downtown facility were built to house the first year departments, finally enabling the medical school to reunify its entire four classes in one building for the first time since the early 1900's.
In 1969, the Tulane Medical Center was established, an organizational structure which broadened Tulane's commitments to medical education, research and patient care. The Tulane Medical Center Hospital and Clinic, the first such university hospital in Louisiana, was dedicated in October 1976. This 300-bed hospital enabled Tulane to consolidate a wide range of patient services in a tertiary care environment. In the few short years since its opening, it has become a major referral center for the region.

Since its founding 150 years ago as The Medical College of Louisiana, Tulane has undergone many changes, not only in name. Several buildings and locations have occupied Tulane buildings, so have federal troops during the Civil War. There have been periods of financial plenty, followed by periods of financial drought. Throughout the years, however, Tulane has always strived to improve its standards of medical education so that today it is ranked among the top medical schools in the country, and perhaps the world. From its meager beginnings in 1834 with 11 students, The Tulane University School of Medicine has gone on to confer a total of 12,291 medical degrees including those conferred on the graduates of the Class of 1984.

I do solemnly swear by whatever I hold most sacred, that I will be loyal to the profession of medicine and just and generous to its members.

That I will lead my life and practice my Art in uprightness and honor.

That into whatsoever home I shall enter it shall be for the good of the sick and the well to the utmost of my power, and that I will hold myself aloof from wrong and from corruption and from the tempting of others to vice.

That I will exercise my Art, solely for the cure of my patients and the prevention of disease and will give no drugs and perform no operation for a criminal purpose and far less suggest such thing.

That whatsoever I shall see or hear of the lives of men which is not fitting to be spoken, I will keep inviolably secret.

These things I do promise and in proportion as I am faithful to this oath, may happiness and good repute be ever mine, the opposite if I shall be forsworn.
THE WAY IT WAS
I've bought every chart, test, and atlas there is—and it's still tough.

Is THAT what that was?

THE HIGHER YOU SET — THE HIGHER YOU GET
A Belated Expression Of Love

With the help from those I love,
My dreams are being realized.
Your support helped me through the rough times.
Your belief in me strengthened the wavering belief within myself.

Your caring and love helped me to reach for my goals even as I felt them elude me.
Without you by my side I might not have had the strength to finish what I had begun.

In words I’ve never expressed, I thank God for you;
The family and friends who never doubted me.

You who stood by my side Encouraging me to go on.
Without you my dreams would have no meaning.
Thank you for helping me be what I am!   D. Chester

MEDICAL DEPARTMENT OF THE UNIVERSITY OF LOUISIANA.
NEW ORLEANS.

FACULTY

T. G. RICHARDSON, M.D.,
Professor of General and Clinical Surgery.
SAMUEL M. BEMIS, M.D.,
Professor of the Theory and Practice of Medicine and Clinical Medicine.
STANFORD E. CHAILLÉ, M.D.,
Professor of Physiology and Pathological Anatomy.
JOSEPH JONES, M.D.,
Professor of Chemistry and Clinical Medicine.
SAMUEL LOGAN, M.D.,
Professor of Anatomy and Clinical Surgery.

ERNEST S. LEWIS, M.D.,
Professor of General and Clinical Obstetrics and Diseases of Women and Children.
JOHN B. ELLIOTT, M.D.,
Professor of Materia Medica and Therapeutics, Clinical Medicine and Hygiene.
ALBERT B. MILES, M.D.,
Demonstrator of Anatomy.

The next annual course of instruction in this Department (now in the fifth year of its existence) will commence on Monday, the 3d day of October, 1883, and terminate on Saturday, the 30th day of March, 1884. The first four weeks of the term will be devoted exclusively to Clinical Medicine and Surgery at the Charity Hospital; Practical Chemistry in the Laboratory; and dissections in the spacious and airy Anatomical Rooms of the University.

The means of teaching now at the command of the Faculty are unsurpassed in the United States. Special attention is called to the opportunities presented for

CLINICAL INSTRUCTION.

The Act establishing the University of Louisiana gives the Professors of the Medical Department the use of the great Charity Hospital, as a school of practical instruction.

The Charity Hospital contains nearly two hundred beds, and received, during the last year, nearly six thousand patients. Its advantages for practical study are unsurpassed by any similar institution in this country. The Medical, Surgical and Obstetrical Wards are visited by the respective Professors in charge daily, from eight to ten o'clock A.M., at which time all the Students are expected to attend, and familiarize themselves with the lessons of the day.

Special instruction is given to the candidates for graduation, who are, for this purpose, divided into classes, assigned to the respective Professors in charge of the wards in the Hospital, and required to keep records of cases under their care. The classes thus formed interchange courses, so as to enable the candidates to enjoy equal advantages. Thoroughly competent Chiefs of Clinics aid the Clinical Teachers in developing to its full extent this system of instruction. Students who are not candidates for graduation make the daily hospital rounds with any of the clinical teachers.

The Administrators of the Hospital elect, annually, after competitive examination, TWELVE RESIDENT STUDENTS, who are maintained by the Institution.

TERMS.

For the Tickets of all the Professors ................................. $2.00
For the Ticket of Practical Anatomy ................................ 10.00
Matriculation Fee .................................................. 5.00
Graduation Fee ................................................... 30.00

Candidates for graduation are required to be twenty-one years of age; to have studied three years; to have attended two courses of lectures and to pass a satisfactory examination.

Graduates of other respectable schools are admitted upon payment of the Matriculation and half lecture fees. They cannot, however, obtain the Diploma of the University without passing the regular examinations and paying the usual Graduation Fee.

For further information

Address ................................................ T. G. RICHARDSON, M.D., Dean.

50% DISCOUNT
ON FIRST YEAR PREMIUM FOR NEW PHYSICIANS
Children’s Hospital/New Orleans takes this opportunity to congratulate the Class of 1984 at the Tulane University School of Medicine.

Children’s Hospital gives babies and youngsters from throughout the region the specialized pediatric care not available in general hospitals designed for adults.

In its Pediatric Intensive Care Unit, Surgical Department, Spinal Pavilion, Rehabilitation Unit and Outpatient Clinics, Children’s young patients receive the best medical care in a loving atmosphere designed exclusively for them. That’s important because children aren’t just little adults.

Children’s Hospital is concerned that you know the valuable resources available from its location in New Orleans for your babies and youngsters.

For more information, call (504) 899-9511.
Congratulations and Best Wishes to the

Tulane University School of Medicine
Class of 1984

from your colleagues and friends at the Ochsner Medical Institutions
