In This Harbor Weary Sea Worn Ships Drop Anchor

And New Launched Vessels Start Their Outward Trips

Within These Walls Life Begins And Ends

- Seal Of Charity Hospital
Charity Hospital
A New Orleans Legend

Steeped in Louisiana history, Charity hospital embraces an intriguing and colorful past, having survived economic hardships, natural disasters, and some of the worst political and patronage problems in the country.

Its charter dates back to January 1736, when Jean Louis, a French sailor, bequeathed his estate to the founding and furnishing of Charity Hospital in early French Colonial Louisiana. This makes it the oldest continually operating hospital in what is now United States territory (Bellevue Hospital in New York City was established two months later.)

Within ten years, it became necessary to build a new building to replace the overcrowded original structure. The new hospital was conveniently located between a canal, for receiving patients and supplies, and a cemetery, for burying the deceased.

In 1779, a great hurricane wreaked havoc on New Orleans, reducing Charity to ruins. Rebuilt, Charity fell prey to a kitchen fire in 1809, which burned the entire hospital to the ground. The indigent sick were temporarily housed in the Cabildo until the hospital could be restored. Five years after the fire, a new hospital was completed with the facilities "vast and commodious, capable of caring for 120 patients."

A group of citizens visiting Charity in 1818 were horrified by the conditions of the patients, the hospital's filthiness, and the total inadequacy of the attendants. They complained to the governor and Hospital administration and it became clear new facilities were again needed. In 1833, the fourth version of Charity was completed at a cost of $149,570. With the arrival of the Daughters of Charity and the Medical College of Louisiana, the overall medical atmosphere in New Orleans was excellent. At that time, the entire medical complex was very likely among the best of its kind in the world.

Charity weathered the Civil War, and prospered during the remainder of the Eighteenth Century. By 1900, the hospital probably contained almost 2,000 beds, while other hospitals in the city had perhaps only 150 beds combined.
As World War I came to a close, a new war was just beginning between the School of Medicine and Hospital Administrators. The worst was yet to come under Huey P. Long's administration. Long immediately reorganized the Board of Administrators and replaced the Superintendent with Dr. Arthur Vidrine. In 1930, Long abruptly dismissed Dr. Alton Ochsner allegedly because of Ochsner's complaints about political constraints placed on his attempts to build a first-rate surgery department at Tulane. This feud, along with the failure of Tulane to award Long the law degree that he desired, quite possibly played a role in the establishment of the Louisiana State University Medical School.

It had been clear for many years that the 100-year-old Charity Hospital building again needed to be replaced. Following Long's assassination in 1933, federal funds became available to build the current structure, completed on June 27, 1939.

After World War II, problems involving interrelationships developed not only for Charity, but also for the medical schools. The Ochsner Clinic emerged as a large medical institution, employing many of Tulane's faculty and developing its own residency training programs. The Veterans Administration Hospital also developed a residency program. With the rise of LSU Medical School, the old controversies between Tulane and Charity were now simply extended to it as well.

In the late 1950's, many sweeping changes were considered for Charity and its associated schools. In the 1960's, the ugly matter of segregation was dealt with and the "colored" and "white" wards that were on separate side of the hospital were eliminated.

By the late 1960's, financial problems for the Hospital and both schools were paramount, particularly as Tulane was increasing its residency affiliations with hospitals other than Charity. Woefully inadequate financing continued, however, and the hospital has lost its accreditation on several occasions since 1975. This threatens not only Charity, but both medical schools and the entire medical education process.

While plans for problem solving are being developed, the question remains, "Is Charity anachronism, or can it be properly funded and equipped to provide excellent care and teaching opportunities as it has in the past?" One can only hope that future administrations will act favorably on initiatives to preserve Charity's tradition and improve on its current state of affairs.

Top to Bottom: Charity Hospital; Charity Hospital ward between 1832 and 1926 when the hospital was forced to place two or more patients to a bed; Sister Stanislaus (1865-1949), former Mother Superior of the Daughters of Charity; View from a callroom; Seal of Charity Hospital.

GRAS
Tulane Medical School

The Tulane University School of Medicine began as the Medical College of Louisiana in September 1834, as three brash young physicians initiated medical education in Louisiana. Establishment of the school was met with considerable opposition from the Creoles, whose European ideas concerning medical education stressed academies well grounded in the Latin and Greek classics. Nonetheless, when the Medical College opened its doors in January 1835, it became the first medical school in the Deep South, and the fifteenth in the country.

There were only eleven students in the first class. Tuition, fees, room, and board came to less than four hundred dollars a year. The first few years were difficult ones as deans seemed to come and go, and faculty members changed as frequently. By 1843, however, there were over one hundred students. Even then, the student body came from as far away as Pennsylvania and Connecticut, which would have been weeks away. They also came from closer states, such as Alabama and Mississippi.

Medical school in those days was quite different than it is today. Only eight months of lectures were required to obtain an M.D. The school year was four months long. The same seven courses were repeated over again the second year. The curriculum consisted of courses in Anatomy and Physiology, Chemistry, Materiae Medica, Principles and Practice of Medicine, Surgery, Obstetrics, and the diseases of women and children. Professors received no salary, but were compensated instead by selling tickets to their lectures to the medical students. Instruction was almost wholly didactic, with practical instruction in Anatomy only. The lectures were delivered to the entire student body assembled in a large room or amphitheater. Clinical subjects were taught in the same manner. Indeed, the unmotivated students would often graduate without ever having attended a delivery, observed an operation or even examined a patient, as these were to be learned as an apprentice to a physician.

Top To Bottom: Tulane University School of Medicine - 1834; Scene depicted above a Medical School entrance; Alexander and Josephine Hutchinson Memorial Plaque above the former Hutchinson Clinic entrance; The former main entrance to the Medical School; A former Medical School site - The Richardson Memorial Building on the Uptown Campus (circa 1946); The original announcement of the opening of the Medical School - 1834
The Civil War brought a halt to all formal medical training in 1862. The Medical College of Louisiana was fortunate to find financial security in the form of Paul Tulane, a wealthy New Orleans merchant, who bequeathed $1,250,000 to provide for a new university. In 1884, the various departments of the University of Louisiana were placed under the aegis of the new institution, The Tulane University of Louisiana.

In 1910, Abraham Flexner published his report of the ranking and classification of medical schools, with Tulane ranked as one of the top three Southern institutions. At that time, Tulane's prominent faculty included the great Dr. Rudolph Matas, a vascular surgeon, and Isadore Dyer, a noted dermatologist who was instrumental in the development of the leprosarium in Carville, Louisiana.

In 1913, Tulane boasted a School of Pharmacy, School of Dentistry, School of Medicine, and Graduate School of Medicine (only the latter two remain today.)

The Tulane Medical Center was organized in 1969 to broaden Tulane's commitment to medical education, research, and patient care. The Tulane Medical Center Hospital and Clinic, the first such university hospital in Louisiana, was dedicated in October 1976. This 300-bed hospital has enabled Tulane to consolidate a wide range of services in a tertiary care environment and it has become a major referral center for the region.

Since its founding 158 years ago as the Medical College of Louisiana, the Tulane University School of Medicine has undergone many changes: the most recent of which have been the addition of a new hospital wing and the Environmental Health Research building. Though Tulane originally catered to students mainly from the South, it now attracts students from all parts of the United States. From its meager beginnings in 1834, the Tulane University of Medicine has gone on to confer over 12,000 medical degrees. Paul Tulane would certainly be proud of the many physicians who have graduated from the university bearing his name.

Each graduating class selects two faculty members as class sponsors and this year Dr. Jaspan and Dr. Ferrara were unanimously chosen. Although these two men have different backgrounds, different personalities, different specialties, and even come from different countries, they share a common love of teaching and an excellent rapport with students.

Dr. Jonathan B. Jaspan is the Tullis-Tulane Alumni Professor of Medicine and Director of the Tulane Diabetes Program and Endocrinology Training Program. A native of South Africa, Dr. Jaspan has been at Tulane since 1991. Dr. Jaspan is highly regarded by students for his outstanding bedside diagnostic and teaching skills. Dr. Jaspan has gone beyond the traditional curriculum to conduct extracurricular weekly physical diagnosis rounds for any interested T3s and T4s as well as a board review course in his home for T4s preparing for USMLE Step II.

Dr. Jaspan and his wife hosted an elegant graduation reception at the English Turn Country Club.
Dr. John J. Ferrara, Professor of Surgery and Director of Medical Student Education for the Department of Surgery, has been at Tulane since 1990. Reflective of his dedication to teaching, he is the recipient of the 1991, 1992, and 1993 Owl Club Awards for Distinguished Clinical Instructor as well as the 1993 Owl Club Award for Course Director, Best Department. Although Dr. Ferrara is distinguished by his quality research and service to patients, it is his dedication to teaching medical students that sets him apart. Students who rotated on Charity Service II were fortunate to spend many hours at the patients' bedside with Dr. Ferrara. Those students who rotated through Charity for General Surgery benefited from his weekly conference and the class as a whole certainly benefited from his General Surgery Syllabus!

Dr. and Mrs. Ferrara hosted two class receptions at their home, one in December and one for Match Day. The Match Day - St. Patrick's Day Crawfish Boil will be fondly remembered.
New Orleans entertains its tourists in its many coffee houses, famous for their unique blends of exotic beans and the flavor of chicory. Medical students, however, soon discover that coffee is much more than a cultural and social drink. Soon after the first exam, the medical student needs a constant supply of caffeine to stay awake during the many long nights of endless study. As T-3's, coffee helps the weary student through long nights on call, morning rounds, "interesting" conferences, and post-call evenings. After many days like these, the med student learns of the numerous places to study, stay awake, and even pawn a free cup of coffee. Here are a few of our favorite coffee houses that we found to help us stay awake through four years of medical school.
The Class of 1994

There are 142 students in the graduating class of 1994. The diversity of our class can be attributed to the wizardry of the late Dr. Wiley Clifford Newman. He took the applications of more than 6,000 ambitious men and women and whittled them down to form our class. We have the cultural diversity of 33 different states and territories as well as seven foreign countries. Approximately one-quarter (25.6%) of our class call California home, while 14% claim Louisiana, 12% New York and New Jersey, and 8% Florida.

Map showing the distribution of states and countries with the number of students from each location.

Dear [Name],

I take great pleasure in informing you of your acceptance into the first-year medical class at the Tulane University School of Medicine, to enter in August of 1990. I sincerely hope that you will accept our invitation to take your medical training at Tulane, and look forward to having you join us.

In order to reserve your place in the class, we must receive, within the next two weeks, written notification of your intent to accept our invitation along with a check for $100 payable to the Tulane Educational Fund. This deposit will be credited to your tuition account for the first semester of academic year 1990-91. The sum of tuition and fees for first-year students in academic year 1990-91 will be $23,000.

I am sure you will understand that your appointment is contingent upon successful completion of all required premedical courses, completion of the academic program in which you are currently enrolled, and maintenance of the level of academic performance that was part of the basis for your acceptance. A final transcript of your grades must be forwarded to this office immediately if you have not already done so.

On the assumption that you might need financial assistance during your first year in medical school, I have asked the Financial Aid Coordinator to forward, under separate cover, application materials and other information. If you need additional information about financial aid, please correspond directly with: Financial Aid Coordinator, Office of the Dean, Tulane University School of Medicine, 1430 Tulane Avenue, New Orleans, LA 70112.

I would also like to call to your attention the opening date of school for the 1990-91 academic session. Orientation will be held on Thursday, August 16, 1990 and Friday, August 17, 1990, beginning at 9:00 a.m. in the Medical School Auditorium, 1430 Tulane Avenue. Registration will be on Monday, August 20, 1990, and classes will begin that afternoon. In the near future, you will receive additional, important information from the Office of Student Affairs.

On behalf of the students, faculty, and administration, I bid you a most enthusiastic welcome to Tulane. If I can be of service to you in any way, please feel free to call upon me.

Sincerely,

W/ Clifford Newman, Ph.D.

Every Touch Counts

Dr. Judith Bray & Dr. Velma Butler

We touch our children in many ways
We touch their minds
We touch their hearts
We touch their souls
We touch their bodies.

There are many kinds of touches
Some touches heal
Some touches hurt
Some touches create
Some touches destroy.

We touch with voices, attitudes, expressions, hands
But every touch counts.

... And I Just Turned Twenty-two
I Was Wondering What To Do ...
Neil Young
Scott Conklin
Franklin Lakes, New Jersey
Occidental College
Advanced Bachelor's Degree, Biology, 1988
You Know You're At Home In New Orleans When...

You drink "Dixie", not sing it.
You not only say Tchoupitoulas, but you can say it without laughing.
You have discovered that those four-inch long cockroaches can fly, but have decided to retain your sanity anyway.
You begin to believe that purple, green, and gold look good together and will even eat things those colors.
You know exactly what you are going to eat next Monday, and the Monday after that, and after that.
You are no longer shocked when someone advises your to "suck the heads and eat the tails".
You make groceries, not buy them.
You're not afraid when someone wants to "axe" you.
You consider it a honor, on certain occasions, to have cabbages or coconuts thrown at you.
You are able to make a U-turn on St. Charles Avenue avoiding joggers, other drivers and moving streetcars.
You describe items of a certain hue as being "K&B purple".
You get on a bus marked "Cemeteries" without a second thought.
You do not think about spinach when you see the word "Popeye's".
You've finally mastered the technique of hitting a cockroach with a shoe just hard enough to kill the cockroach but not ruin your Oriental carpet.
You'll only eat a sandwich that's bigger than your head.

Are You A T1?

Brain (Like a dry sponge)

Nasal Mucosa (Sloughed secondary to formaldehyde)

Tie (Tightens to see if Carotid Sinus Reflex really works)

Never wore glasses until Med School

Bags Under Eyes (With cadaver all night)

Smile (Doesn’t know what he’s gotten himself into)

School rules state ID badge must be worn at all times

Learned in Biochemistry that Vitamin C is an antioxidant!

Beads (Received in orientation packet doesn’t know what they’re used for)

Class Notes (Took his own)

Gunner Pen

Multicolored Highlighters (For color-coding notesets)

Studied Gross during Phi Chi Luau
Are You A T2?

Brain (Saturated sponge)
Smile (Not thinking about USMLE)

Stethoscope (Today heard S4 in patient with atrial fibrillation)

Hospital rules state ID badge must be worn at all times
Liver (Fatty change)

"Black Bag" (Must be on military scholarship)

T2 Morning "Eyeopener"

Contact Lenses (Able to wear again)
Bags Under Eyes (In pathology Lab all night)

Crash Scissors (Really useful in PD)

Lab Coat (So fresh it stands by itself)

Ophthalmoscope (Blinded herself looking for patient's "red reflex")

Fexflex Hammer (Poised and ready)

The T2 nightmare
Class Notesets (Worth their weight in gold)

Books (Worth their weight in paper)

Jumped off garage roof at Phi Chi Luau

Are You A T3?

Brain (Dazed and confused)

"Surgical Cap" Head

No Glasses (Lost in call room)

Bags Under Eyes (Up all night on call)

Smile (Fading-knows what he’s gotten himself into)

No ID Badge (Now used only to get into Reilly)

Stethoscope (Always hears RRRs (MGR)

Charity Key

Lab Coat (So grimy it stands by itself)

Otoscope with uncharged batteries

T3 Morning “Eyeopener” (Once confused with specimen cup)

Scut List on clipboard

"Textbooks" (Only buys pocket versions)

Liver (Alcoholic hepatitis)

Scrubs (Has worn for the past three days and nights)

Trashcan (Leans on during marathon rounds)

Unknown Bodily Secretions

Placenta Foot

Switched schedule to be on call during Phi Chi Luau
Are You A T4?

Brain (Pickled)

Bags Under Eyes (Up all night partying)

Smile (Finished personal statement)

Stethoscope (Forgot how to use, orders echo)

Newsweek (Only journal read this year)

Tennis Elbow

Suntan Lotion

Tulane Bookstore Bestseller

"Studying" for Community Medicine rotation

Studied more for scuba certification than for any other exam this year

Took out additional ALP to buy rollerblades and take tennis lessons

T4 Morning "Eyeopener"

Went to a REAL Luau

Its All Greek To Me . . .

The staff of Aesculapius (Latin spelling) is pictured as a wooden staff with a single serpent twining around it. Aesculepius (Greek spelling) was the Greek god of medicine, and was the son of Apollo and the nymph Coronis. According to legend Coronis was killed for being unfaithful, but Aesculapius was saved and raised by Chiron, the centaur, who taught Aesculapius the ways of the healing arts. Aesculapius married Epione and had several children including two daughters, Hygiea and Panacea, and two sons, Mchaon and Podaleirios, the two sons being noted by Homer in the Iliad as physicians during the Trojan War. The remedies practiced by Aesculapius varied from benign advise such as fasting to reduce fever, to more violent therapies of bleeding, abstinence, and "friction". Many temples were built for Aesculapius, the more famous ones being Cos, Cnidus, and Epidaurus, and it was common for stricken individuals to actually sleep at the temples whereby the gods would visit them at night and their dreams would be interpreted in the morning for clues toward the cure of their ailment. One legend describes Aesculapius' death as a result of a thunderbolt hurled by Zeus who was jealous of the healing skills possessed by Aesculapius as they threatened to make men immortal and therefore equals to the gods. The tradition of Aesculapius was brought to Rome around 293 B.C. in hopes that it would bring good luck and healing against a plague that was at that time assailing the city.

The image of Aesculapius was always with a walking staff in hand, around which twined a single serpent. The snake has historically represented wisdom, learning and fertility. It's association with the healing arts may well come from it's long life, keen eyesight, and annual renewal of skin. The staff and snake symbol eventually came to stand on it's own to represent the pure, ethical, and non-commercial ideals of medicine. It is currently the symbol for the Royal Medical Corps of Great Britain, the American Medical Association, and the Royal Canadian Medical Corps.

The caduceus consists of a long, straight staff, topped by a pair of wings, and around which two serpents are entwined. It's development into a symbol for medicine is somewhat more obscure.

A look to Greek mythology reveals that the staff is associated with Hermes, the wing-footed messenger of the gods (Roman: Mercury), who carried the staff as a symbol of peace. As legend goes the staff was originally given to Hermes by Apollo as a reward for allowing Apollo to invent the lyre. The staff had the power to unite all things divided by hate; when Hermes traveled to Arcadia he came upon two serpents locked in combat at which time he placed the staff between them and observed the cessation of their fighting and a friendly entwining of both snakes around the staff. The word caduceus roughly translates to "herald's wand" in Greek. The wand was carried by heralds and town cryers, and served as both a symbol of public office and as an emblem of peaceful and neutral gatherings. It was first used as a medical symbol in the 16th century by Johann Froeben, a publisher of medical books, who used to print the caduceus on his title pages. Then a physician to Henry VIII began to use the emblem on his crest. In 1856 the caduceus was associated with the "Hospital Stewards of the U.S. Army". In 1871 the U.S. Public Health Service began to use the symbol, and it was finally adopted by the U.S. Army Medical Corps in 1910. One possible reason for the development of the caduceus to represent medicine over the staff of Aesculapius is that it is a more balanced and aesthetically pleasing symbol.

— David R. Quincy
The Oath Of Hippocrates

I swear by Apollo, the physician, the Aesculapius, and Health and All-Heal, and by God and by whatever I hold most sacred, that, according to my ability and judgment, I will keep this Oath and this stipulation - I will look upon those who shall have taught me this Art even as one of my parents.

I will share my substance with them, and I will supply their necessities if they be in need.

I will regard their offspring in the same footing as my own brethren, and I will teach them this art, if they shall wish to learn it, without fee or covenant.

I will impart a knowledge of the Art by precept, by lecture, and by every mode of teaching not only to my own children but to the children of those who have taught me, and to disciples bound by covenant and oath, according to the Law of Medicine, but to none other.

The regimen I adopt shall be for the benefit of my patients according to my ability and judgment and I will abstain from whatever is deleterious and mischievous.

I will seek to inform my patients fully about their illness and prognosis, and will always remember that the final decision regarding their own life rests with the patient.

I will regard my patients always as fellow human beings and will do everything possible to preserve their dignity.

With purity and with holiness I will pass my life and practice my Art.

Whatsoever things I see or hear concerning the life of men in my attendance, on the sick or even apart therefrom, which ought not to be noised abroad, I will keep silence thereon, counting such things to be sacred secrets.

While I continue to keep this Oath unviolated, may it be granted to me to enjoy life and the practice of the Art, respected by all men, in all times.

But should I trespass and violate this Oath, may the reverse be my lot.

8. Pablo Uribasterra
Are You An Orthopedist?

Has memorized extensive differential: 1) bone broke, 2) bone not broke

Frontal bossing

Stethoscope used only on the "pod point": the one location at which RRR = MRG, CTA B, and +BS are simultaneously determined

Racquetball goggles to protect against splashing bodily fluids and bone chips (also worn on racquetball court two nights a week)

Sum total of orthopedic knowledge: hasn't finished coloring all the pictures yet

Still plays on undergraduate intramural teams

The orthopod lifts weights regularly. As the saying goes, "An orthopod is as strong as an ox, and twice as smart."

The precise, delicate instrument of the orthopedist's trade (can even calibrate it by himself)

Baseball glove carried as a reminder of his "glory days" playing baseball

Orthopedic definition of heart: muscular organ in chest used to pump Kefzol to bone

Q: How do you hide something from an orthopedic surgeon?
A: Write it in the chart.

Chose Orthopedics because . . . Carpentry school was closed
Are You An Internist?

1. Bloodshot eyes
2. Stethoscope: Earpiece missing, hasn’t noticed yet
4. Ophthalmoscope: Hasn’t seen optic disc since 2nd year PD
5. Extra glove: Charity phlebotomy tourniquet
6. Otoscope earpiece: Misplaced earlier today
7. Aching shoulders from overstuffed jacket
8. Syringes for blood drawing: No Vacutainers at Charity
9. Red top: Drawn last week and forgot to drop off at lab
10. EKG: Needs Cardiology consult to interpret
11. Beeper: Likes vibratory mode best
12. Reflex hammer
13. TED hose for extra support
14. Fallen arches from rounding all day
15. Everything you always wanted to know about medicine but didn’t have time to read

Chose Internal Medicine because ... Has never read Samuel Shem’s “House of God”
Are You An OB/GYN?

Glasses: To better visualize ureter while knicking it

Goggles: To prevent exposure to body fluids

Shield: For those days when you need a little extra protection

Wheel of torture for estimating EDL (Estimated Date of Litigation)

Culturettes: Takes them on dates

Reflex hammer: For checking signs of pre-eclampsia and for knocking out screaming tachy-lordees

Double-bootied

Monitor strip for monitoring uterine contractions, fetal heart rate, and Dow-Jones Industrial Average

"My Maneuvers" by Leopold

"Jurisprudence Malpracticus" by I.M. Asnake, J.D.

"Double Footling Breech, Behind the Back, and Other Fancy Deliveries" by M. Biswas

Baby in pelvis: "This thing fits through there??"

Speculum: "At your cervix!"

Culturettes: Takes them on dates

Chose OB/GYN because ... Doesn't like to sleep anyway
Are You A Psychiatrist?

Coffee: Caffeine source to keep up with the manics

Newspaper: Scans police reports daily for familiar patient names

Globe and travel magazines: To help plan monthly vacations

Stethoscope: Forgot what it's used for

Oral fixation

Juice (Fortified with Vitamin H): Offered to uncooperative patients

Clock for appointments: Measures in 50 minute increments

Hemorrhoid prophylaxis

Affect appropriately flattened

Sigmund: Suffers from separation anxiety

Chose Psychiatry because ... Two words: Free Therapy
Are You A Pediatrician?

- Chronic rhinitis
- Felix the Cat, the wonderful, wonderful cat
- Regarding a raisin
- Goofy watch
- Daffy pen
- Water-logged pinky from baby sucking
- Multiple toys - diversionary tactics
- Harriet Lane - checking own growth parameters
- Insufflator: Has created only one pneumoccephaly
- "Dr. Spock's": To relate to parents
- Coloring book: To relate to patients
- Nelson's: Will have time to read
- Medloans: Never to be paid off
- Calculator: "How many pounds in a kilogram?"
- Stuffed animal: NOT Barney
- Tool box: For those late night meconium deliveries
- Sneezy, Wheezy, Drippy, Drooly, Stinky, Snotty, & Infectious

Chose Pediatrics because . . .

Is taller than most patients
Are You A Radiologist?

Wow! Look at those breast shadows

Sunglasses to prevent glare of viewbox

Hotlight: Doubles as sunlamp for quick tanning between films

Nonspecific findings; Clinical correlation required

Last film of the day: It must be lunchtime

Radiation tag in pocket monitoring radiation exposure to most valued assets

Dictaphone: Has lost ability to write

Ultrasound elbow

Chose Radiology because . . . Needs extra time to work on golf handicap
Are You A Surgeon?

- Wet shoulder: Used as staff's sweat sponge
- Bovie: Love that smell of burning fresh
- Ferrara's Manual: Cliff's notes for the surgeon
- Staple gun: No time for sub-cuticular stitches
- Triple gloved
- Booties: To keep clogs clean
- Flea repellent: Used to keep medicine doc's away
- Lap sponge: One left in last patient
- Extra sutures to practice knot tying

Tries to maintain vacant expression to avoid being pimped during Saturday morning rounds

Retractor: The medical student's surgical instrument

Pen in scrub pocket: For emergency trachs

"Can I have a bigger blade, PLEASE!"

Flea repellent: Used to keep medicine doc's away

Chose Surgery because ... Thinks to self, "What else is there?"
Are You Undecided?

I could do Emergency Medicine . . . but I look bad in scrubs

I could do Ophthalmology Ophthalmology Ophthalmology . . . but I misspelled it on my applications

I could do Internal Medicine . . . well, the subspecialties are
Okay, but I'd have to do Internal Medicine first

I could do Dermatology . . . but they won't let their residents tan

could do Psychiatry . . . no, I have enough problems of my own

I could do ENT . . . but I don't know how to use that Marcus Welby over-the-eye mirror thing-a-ma-jig

I could do OB/GYN . . . GROSS!! Too many body fluids

I could do Radiology . . . but I'd go crazy sitting in a dark room by myself all day

I could do Neurology . . . but that "anal wink" thing really bothers me

I could do Family Practice . . . I don't want to move to the boondocks

I could do Neurosurgery . . . but I don't have a God complex

I could do Anesthesiology . . . but I'd have to work with surgeons all day

I could do General Surgery . . . but I'd have to work with surgeons all day

I could do Pediatrics . . . I like the kids, but I can't deal with the parents

I could do Pathology . . . at least I couldn't kill anybody

I could do PM & R . . . what do they do anyway?

I could do Orthopedics . . . no, a mind is a terrible thing to waste
Alpha Omega Alpha
Honor Medical Society

Election to Alpha Omega Alpha is a distinction that accompanies a physician throughout his or her career. Especially for the young physician, the society provides a forum for the exchange of ideas, as well as a source of valuable contacts. Members can be elected as students, graduated, or faculty of an affiliated institution, or, because of distinguished achievement in any field, on an honorary basis. Elections in the first three categories are carried out by the individual chapters. Chapters elect undergraduate members from students in their last two years of medical school. Scholastic excellence is not the only criterion for election: integrity, capacity for leadership, compassion, and fairness in dealing with one's colleagues are considered to be of equal significance, and the number of students elected from any class may not exceed one-sixth of those expected to be graduated. The students elected to the society are men and women who, in the judgment of the local chapter, have shown promise of becoming leaders in their profession.
The Class of 1994

The diversity of the graduating class of 1994 is reflected in the residency programs and medical specialties chosen. We will pursue our careers in 31 different states and in 17 different specialties. The distribution is as follows:

5 - Anesthesiology
3 - Emergency Medicine
15 - Family Practice
27 - Internal Medicine
3 - Medicine/Pediatrics
1 - Neurology
12 - Obstetrics and Gynecology
3 - Ophthalmology
1 - Pathology

12 - Pediatrics
1 - Physical Medicine and Rehabilitation
5 - Psychiatry
8 - Radiology
32 - Surgery
20 - General Surgery
4 - Neurosurgery
5 - Orthopedic Surgery
3 - Otorhinolaryngology

Our future was declared on a warm New Orleans day, March 16, 1994. Nervously, we began filing into the auditorium at 10:30 am. On the stage, Drs. Pisano and Tomlinson sat behind a small stack of envelopes. Roll call began at 11:00 am. One by one, as hailed by Dr. Tomlinson, we headed toward the stage to obtain our envelope and our future. There was much cheering, jumping, and celebrating. Finally at about noon, the class of 1994 had successfully completed Match Day 1994. It was one of the most successful Matches in Tulane history. 91% of people matched into one of their top three programs: 69% of our class obtained their first choice, 15% their second and 7% their third.

Congratulations
1994 Graduates

from CREW OF ZIP-A-DEE-DO-DAH

and OTHERS
Congratulations

Congratulations, **Philip**
With joy and love. Dad, Mom, Michael, Nora & Sara

Congratulations **Matt**!
We love you and are very proud of you! Dad, Mom, Michael, Nora & Sara

Zowie **Dr. Burt** Medicine Man
Love, Mom & Dad

Congratulations **Brad**! Your wonderful wit, determination & perseverance have made us so proud of you. You are very special. Love Mom, Dad, Brian

Congratulations **Dr. Scott**, on earning your doctorate. No one deserves it more than you. Your dedication, desire & attitude of "my way" has finally paid off. Mom, Dad, Brothers

**Theresa**, love and congratulations to a special daughter & sister. We are proud of you! Mary, Denise, John, Rose, Mike, Kevin, Brenda, Dad & Mom. Your caring nature will bring relief to all you serve.

Congratulations, **Dr. Will**!
We are so proud of you.
Love, Mom, etc.

Congratulations **Joyce**!
We are so proud of you.
Love Mom, Dad, John, Jenny Michelle, & Jimmy.

**Brad**, You will be a great physician because...
"The Shadow Knows"

Congratulations **Tom**! We know you'll be a great doctor. Love, Mom, Dad & Nancy.

Congratulations **Docmock**!
- The Lari Connection

Congratulations to our son **Dr. Ted Wei Jr.** We know you'll be a very great doctor. We love you & are very proud of you. Dad, Mom & your sister Glenna

**Caryn & Peter:**
The world is ahead of you. We will always be beside you. We are so very proud! We love you, Mom & Dad.

Congratulations, **Teck Tan**, from your families in Singapore and Florida. June 4 is a most special day! Only missing part will be the absence of Mary Smith Mallory. Much love from your worldwide family. Ben Johnston.

Congratulations **Gina Gill, MD**
You did it! We Love You.
Mom and Dad

Congratulations **Binh Ho MD**
You reached the top of the hill. Be compassionate in your service to mankind. Love, the Hos
Congratulations

Dr. Stephenie - How great it is! A very proud Kaye and Daddy.

Congratulations, Marc Weiss, M.D. We are so very proud of you!!! We love you and wish you happiness and success. Mom & Dad and Derek, Monte & Lori.

Congrats: Seth, Beth, Albert, Pete, Keith, Eric, Charlie & Mark. From your N.O. parents, Bob & Ruth. May the Force be with y'all.

Congratulations Tracy Harpel! We love you & are so proud of you! May all your dreams come true. Love - Mom, Dad & Wendy

Congratulations Brad! Love, The Longo Family.

Matt: Congratulations to our grandson. Through these years you've brought us joy & fun. Love Grandma & Grandpa Champion.

Craig Gosdin, MD Congratulations, Unc. Giants Forever!

Dear Saundra - Congratulations! You reached your goal. Love, Mom, Susan, Stephanie & Shelly

Jim Bass We are proud of you & we love you! Your Family.

For Eric: We're so proud of you! We've given you the two things we can; roots for strength and stability; wings to fly. Go soar! Congratulations. With love, Mom, Damon, Stuart, & Beth

Kenton - As you journey into your tomorrows may it be a wonderful life. Congratulations and love, Mom, Tom, Meghan & Alec.

Chip: We knew you could make it!! Now you can take us shopping -POLO-only! Love Carl, Marla, Rachel, & Anthony.

Nina Lucas MD You're fantastic as always. Mom, Dad & Tiger

We are proud of our daughter Wendy Coffman, M.D. Your dreams have come to fruition. Love - Mom, Dad and all the family

Fly high, Brad. You made it all happen! Love, Michele.

Congratulations and Love! Virginia Ruth Lolley, M.D. Mom, Tom and Caren.
Chip - Great achievements require time. Congrats on your fine success! Love, Kathy, Clarke, Katelyn & ?

Job well done Matthew Shawl! We love you and are proud of you. We wish you continued success in New York. Mom, Dad, and Andy.

We're so proud of you, Suse - Now you're our Dr. Sunshine!! Love Mook, Pook, Nanny & Boomp.

Congratulations Dr. Steve: We are very proud of you, wish you much success and happiness and know that you will be a credit to your profession. Love - Mom, Dad, Ron, Stacey & Nanas.

Congratulations Dr. Peppers! We are so proud of you. You worked hard and overcame many obstacles to get where you are today. We love you so much. Dad, Mom, Granny and Family.

Congratulations Dr. Matthew! We know you'll be a great doctor Love, Grandma and Grandpa Shawl.

Stephenie - We are so proud of your achievement of your dream. We love you! Mom, Dan and Matt.

Proud! You bet we are! What an accomplishment Dr. Chip!! The world is your oyster - Here's to lots & lots of pearls. Love, Mom & Dad.

Craig Gosdin - We love you and are very happy for you! Dad, Mom, Allan and Unk.

Dr. Rouzbeh Kordestani Congrats and welcome to the next higher level. Be as compassionate in your service to mankind as you are. Love: Mom, Dad and sis Ronak.

Gloria: We are very proud of the choices you've made, the goals you've accomplished, the respect that you've won and I hope you know too, how much we love you and wish all your dreams come true. Your Family

The Candy Jar
Children's Hospital congratulates the graduates of the Class of 1994 of the Tulane University School of Medicine.

Many of you have completed clinical rotations at Children's Hospital in pediatrics, pediatric subspecialties, pediatric rehabilitative medicine, pediatric orthopaedics, pediatric surgery, pediatric surgical subspecialties, pediatric radiology and in a host of other areas. We have been delighted to have you be a part of Children's Hospital and to see how a union of the Children's Hospital with the private practicing community and its affiliate institutions, Tulane University and Louisiana State University, has made us a most dynamic and growing force in pediatric care in the State of Louisiana and the entire Gulf Coast area. We look forward to continued growth, and we are certain that many of you will be a part of that growth.

As your residencies and fellowships progress we hope that many of them will be done in part here and that we will have the opportunity to watch you grow professionally. We hope that you will be frequent visitors and learn of the resource of our Children's Hospital in the New Orleans and Louisiana community.

Congratulations for much happiness and fulfillment in the future.
BEST WISHES & CONGRATULATIONS
TO THE CLASS OF 1994!

THANKS!
On December 31, 1992, respected dean, educator and friend Dr. Clifford Newman passed away peacefully in his sleep. Dr. Newman’s warm smile and sense of humor greeted us during our medical school interviews and continued to cheer us during the hardships of medical school. He treated us as peers, and we looked upon him for support and guidance.

When it came to helping those in need, Dr. Newman was always willing to participate. He helped the children of Charity Hospital by emceeing our talent shows. Whenever tragedy befell one of us, he was there to share our sorrow or give an encouraging word. He made it clear to us all that his advice was but a phone call away. Dr. Newman received numerous awards, including the distinguished Gloria P. Walsh Award for excellence in teaching and service to students.

Dr. Newman had a role in selecting every physician to graduate from Tulane over the past twenty years. He has an ability to take a pool of thousands of applicants and from it create a diverse and cohesive class. We, the members of the Class of 1994, are proud to have been brought together by a man we respected and grew to love.

Dr. Newman, we wish you were here to see us fulfill the dream you made possible. We thank you and dedicate our yearbook to you. May God Bless you Dr. Newman, our mentor and our friend.
